INDEX	203

Edmonton, February 1, 1965

TO HIS HONOUR,

JOHN PERCY PAGE,

Lieutenant Governor of the Province of Alberta.

Sir:

I have the honour to transmit the Annual Report of the Department of Education for the school year 1963-64.

I remain, Sir, your obedient servant,

RANDOLPH H. McKINNON,

Minister of Education

HONOURABLE ANDERS OLAV AALBORG

The Honourable A. O. Aalborg became Minister of Education on September 9, 1952, retaining that office until July 31, 1964. Born in east-central Alberta he attended high school in Chauvin and Vermilion. Having trained as a teacher at the Edmonton Normal School he taught in his home area and at the time of his election to the Legislature and subsequent appointment as Minister was principal of the school at Rivercourse. He was Vice-President of the Alberta Teachers' Association when he entered the Legislature.

During Mr. Aalborg's period of office many events of much significance took place in education in Alberta of which the following are some of the chief:

1. The work of the Co-terminous Boundaries Commission, giving common boundaries to municipal and school areas throughout most of the Province.
2. Expansion of the county form of municipal and school government in rural areas.
3. Various revisions of The School Buildings Assistance Act and the development of its successor, The School Buildings Act.
4. The passing of The Students Assistance Act.
5. Special measures to deal with an acute shortage of teachers.
6. The opening of the Alberta School for the Deaf.

7. The development of the Public Junior College legislation.
8. The work of a Royal Commission on Education.
9. The subsidization of a textbook rental plan, operated by local school authorities.
10. Establishment of Northland School Division, primarily to improve educational service in isolated Metis communities.
11. Great expansion of vocational education facilities, both locally operated and provincially operated, under the provisions of the Technical and Vocational Training Agreement with the federal government.
12. Raising of the minimum period of teacher training to two years beyond University of Alberta matriculation.
13. The establishment of the School Foundation Program for the financing of elementary and secondary schools.

Throughout the whole of this time the educational system of the Province grew rapidly in terms of number of pupils, numbers of teachers, new schools, classrooms, gymnasiums and other facilities, extent of high school service and the centralization of schools.

In all of these matters Mr. Aalborg, as Minister, played an energetic and stimulating role, maintaining the respect of those whose problems he was required to adjudicate. At the conclusion of his term of office he was elected an Honorary Life Member of the Alberta School Trustees' Association.

REPORT OF THE DEPUTY MINISTER

THE HONOURABLE R. H. McKINNON,

Minister of Education,
Edmonton, Alberta.

Dear Sir:

I have the honour to submit herewith the annual report of the Department of Education for the school year ended June 30, 1964. Statistical information relative to the financial operations of school boards covers the calendar year 1963.

STAFF

In April, 1964, Dr. E. D. Hodgson assumed the office of Director of School Administration succeeding Dr. J. W. Chalmers who had resigned. Dr. Hodgson had previously served the Department of Education as Superintendent of Schools and High School Inspector.

LEGISLATION

The major item of new legislation in the field of education was The University and College Assistance Act. This Act provides for operational support of the University of Alberta by way of an annual grant per student, the amount being subject to review from time to time. It provides also for a Capital Development Committee to review and pass upon capital projects proposed for the University. Provision is made in the Act for support, both current and capital, of public junior colleges. Private junior colleges, affiliated with the University of Alberta, may also be assisted by way of grants toward current operations, and by certain guarantees of loans for capital purposes.

The University Act was amended to provide for a President at the Calgary campus and to give increased jurisdiction over academic matters to a general faculty council there.

Other changes in the school law are referred to later in this report.

HIGHER EDUCATION

In addition to the legislation referred to above the question of the nature and extent of independence of the Calgary campus of the University of Alberta came to the fore. The Board of Governors went on record as favoring some form of independence of the two campuses and set up a special committee under the chairmanship of Mr. Justice Hugh John Macdonald to recommend what should be the form or forms of university government and administration.

A second junior college came into existence under the provisions of The Public Junior Colleges Act, namely Red Deer

Junior College. The participating school authorities are Red Deer Public School District, Red Deer Separate School District, County of Red Deer, County of Ponoka, County of Lacombe, County of Mountain View.

A third junior college was nearing completion of its corporate organization at the end of the period being reported on, this being at Medicine Hat.

VOCATIONAL EDUCATION

While the major activities in this regard continued to be the operation of the Institutes of Technology at Calgary and Edmonton, and the provision of facilities as part of the high school programs of local school authorities, a number of other activities operated under the Technical and Vocational Training Agreement with the federal government.

Reference may be made to the setting into operation during this reporting period of a Small Business Management Training Program designed, through locally organized sponsorship, to offer courses designed to improve the efficiency of operation of small business.

Other activities are concerned with training and academic up-grading of unemployed, training of handicapped persons, and a variety of programs which are described in the Report of the Director.

Respectfully submitted,

W. H. SWIFT,

Deputy Minister.

REPORT OF THE DIVISION OF INSTRUCTION

T. C. Byrne

Chief Superintendent of Schools

The responsibility for directing the provincial public school service and maintaining desirable standards of instruction resides with the Division of Instruction, under the charge of the Chief Superintendent of Schools. The following branches function within this division:

The Supervisory and Evaluative Branch, which includes
Provincial Superintendents of Schools
Inspectors of High Schools
Special Supervisors

The Special Services Branch, which includes
Special Education
Examinations
Research Office
Correspondence School
School for the Deaf
Students Assistance Board

The Curriculum Branch, which includes
Teacher Service Bureau
Audio-Visual Services
Editorial and Library Service

Office of the Registrar, which includes
Teacher Certification and Records
Board of Teacher Education and Certification

Branch Heads:

T. C. Byrne, M.A., Ed.D.—Chief Superintendent of Schools

R. E. Rees, M.A., Ph.D.—Director of Special Services

M. L. Watts, B.A.—Director of Curriculum

J. I. Sheppy, M.A.—Registrar

Reports from the above-named branches appear hereunder.

SUPERVISORY BRANCH

The Chief Superintendent, in addition to presiding over the instructional division, assumes direct responsibility for the work of the Supervisory Branch. The Chief Superintendent is Chairman of the Board of Teacher Education and Certification, and of the High School and University Matriculation Examinations Board, as well as being a member of the Senate of the University of Alberta.

The major duties of the Chief Superintendent are to co-ordinate the work of the instructional division as a whole, and

to provide leadership to the staff of provincially and locally employed superintendents. This is done by conferring with branch heads within the Division of Instruction, attending major curriculum meetings, and consulting with school superintendents through regional and provincial conferences (see Annual Report, Department of Education, 1961, p. 11).

Staff Changes

During the year three retirements occurred: Dr. J. C. Jonason, from the position of High School Inspector of the South-East Edmonton Zone; Mr. C. M. Lavery, from the position of Superintendent of the Calgary Urban Inspectorate; and Mr. H. A. Kostash, from his position as Superintendent of Smoky Lake School Division.

Mr. E. C. Miller resigned from the position of Superintendent of Schools in the Lethbridge School Division; Mr. A. A. Aldridge as Provincial Supervisor of Guidance; and Mr. M. R. McDougall, from his position as Assistant Supervisor of Industrial Arts. Mr. O. Massing resigned from the high school inspection and curriculum staffs; and Dr. A. Proudfoot from the staff of provincial superintendents.

The following were on leave of absence for graduate study at various universities in Canada and in the United States: Mr. R. Leskiw, (second year); Mr. O. L. Matson, Superintendent, Pincher Creek School Division; Mr. G. H. Binnington, Superintendent, Wainwright School Division; and Mr. T. E. Giles, Superintendent, Fort Vermilion School Division.

Dr. E. D. Hodgson left the high school inspection staff to become Director of School Administration.

The following appointments were made to the staff of provincial superintendents, high school inspectors, and supervisors, to fill vacancies created by retirements, resignations, promotions, and leaves of absence:

Mr. R. H. Cunningham, formerly Provincial Supervisor of Industrial Arts, became High School Inspector with special responsibilities for vocational education.

Mr. J. S. Hrabi, formerly Superintendent of Schools, was appointed to the high school inspection staff.

Mr. J. Harder, formerly a teacher in the County of Mountain View, became Provincial Supervisor of Industrial Arts.

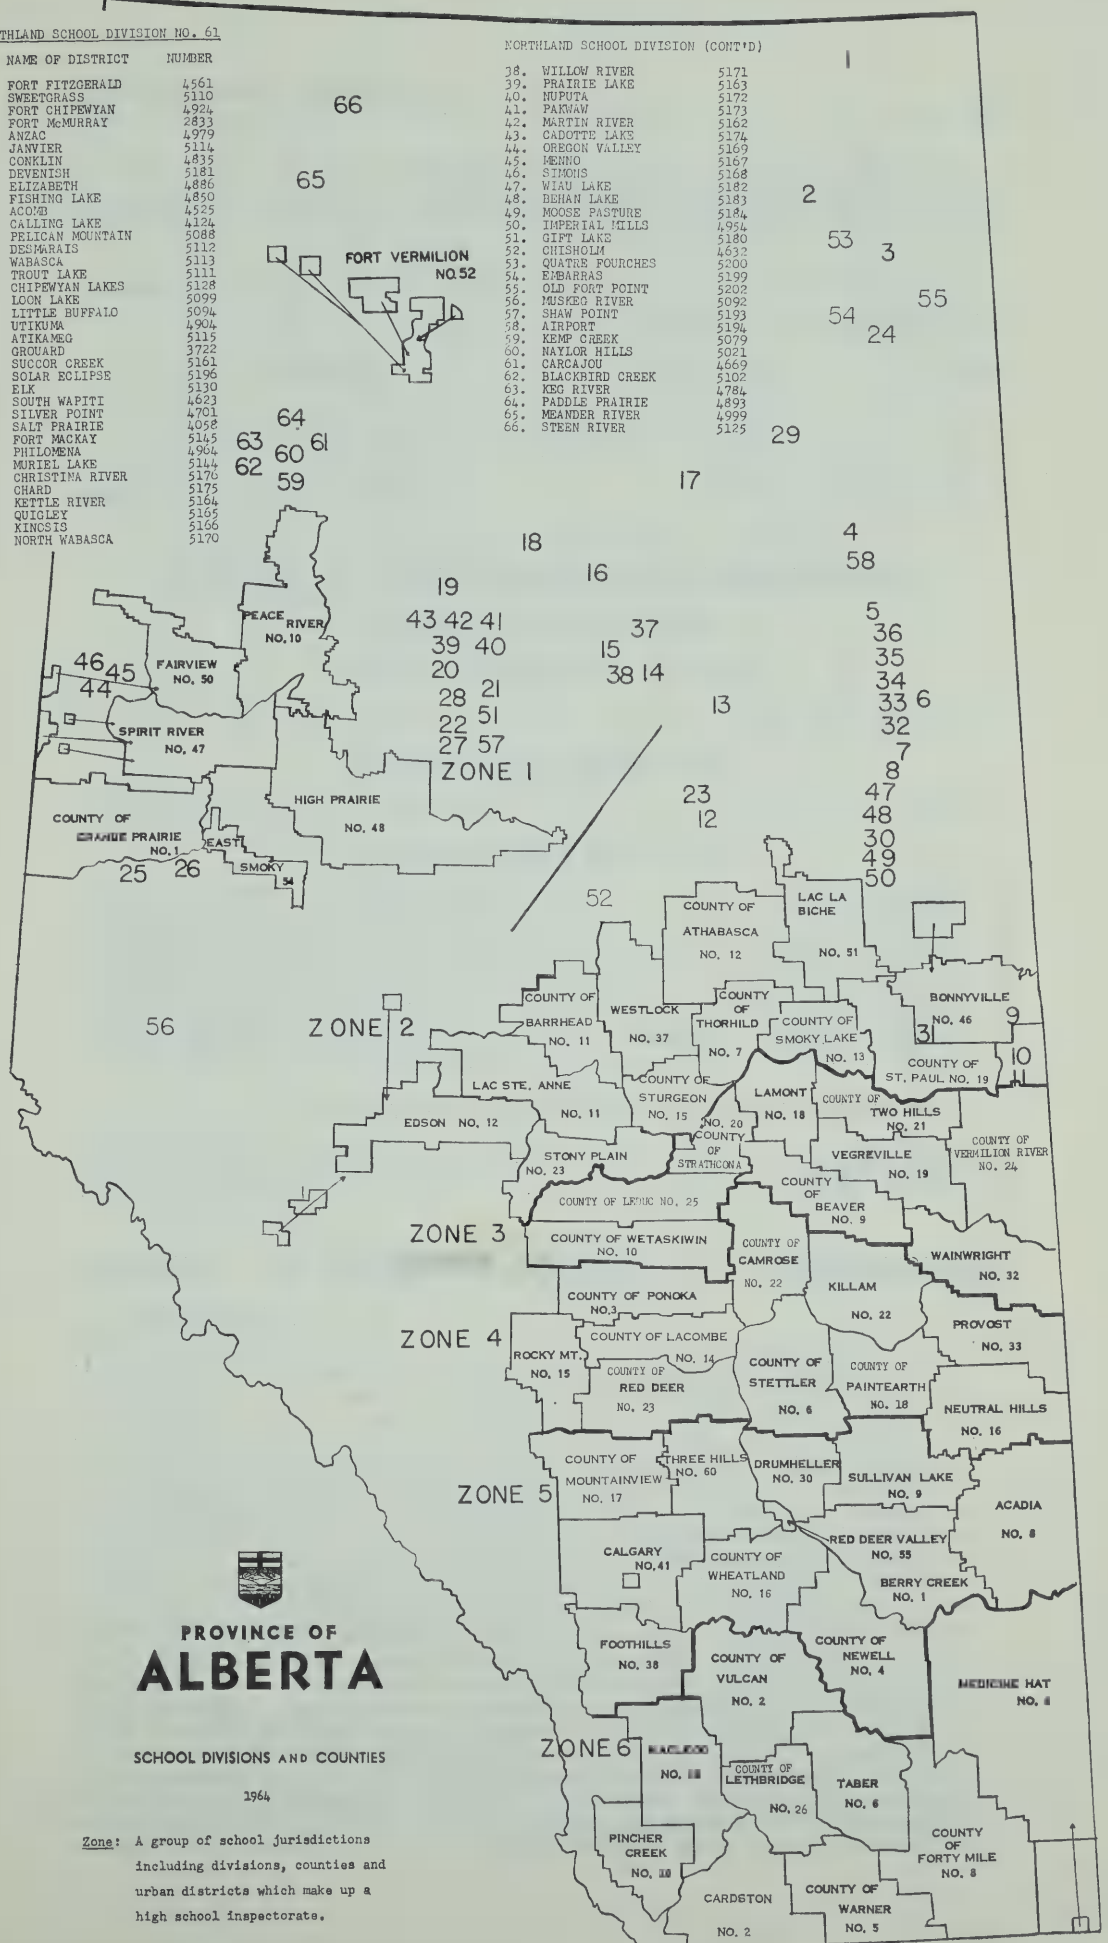

Mr. J. D. Friesen, doctoral student at the University of Alberta, became Provincial Supervisor of Guidance.

Mr. E. R. Daniels, Assistant Superintendent in the High Prairie School Division, assumed the responsibilities of Superintendent for the Fort Vermilion Division.

Mr. H. G. Sherk, formerly principal of the Beaverlodge School, accepted the post of Acting Superintendent for the Pincher Creek School Division during Mr. Matson's absence.

REPORT OF DIVISIONAL AND COUNTY SUPERINTENDENTS OF SCHOOLS

Consolidated by E. K. Hawkesworth

I. OPERATION OF SCHOOLS

- A.** Changes made in the Foundation Program Fund Regulations during the past year caused many boards to study carefully all facets of the operation of schools. Attempts were made to change the pupil-teacher ratio in some areas but this was done only when educational standards were not lowered. Action aimed at standardizing services and equipment was implemented in a few instances.
- B.**
1. Most boards were prevented from increasing the pupil-teacher ratio in their divisions or counties because of parental demand for single grade classrooms, extension of programs in small high schools, sparse population and geographic factors.
 2. A few boards engaged additional supervisors and other specialized personnel. Those already having such personnel retained them. A significant number of boards provided no such supervisory service.
 3. A.T.A. specialist councils carried out an effective program with small groups of teachers and this effectiveness increased in areas adjacent to urban centres. Reasons given for lack of extensive teacher participation in such councils were isolation, heavy teaching loads and extensive local inservice programs. Those who did participate in the programs of the councils were active in programs for improving instruction. The councils in administration, mathematics, social studies, English and science were frequently commended for their activities.
 4. Superintendents reported that the small high school was increasingly ineffective in meeting the educational needs of students and was economically unsound. Reasons given for the ineffectiveness of small high schools were:
 - (a) Limited educational offerings.
 - (b) Shortage of competent teachers willing to teach in them.
 - (c) Limited competition among students.
 - (d) Low pupil-teacher ratio.

It was stated that in some cases small high schools were being subsidized through high elementary enrolments. The continuation of small high schools in isolated and sparsely populated areas was deemed essential. Boards tried to make the small high school more effective educationally by extending the use of correspondence courses, increasing teaching staff and utilizing vocational offerings in nearby urban centres. Most superintendents recommended centralization

of high school facilities but recognized certain difficulties in achieving this.

- C.** Forty or more counties or divisions experienced a shortage of teachers. At the same time they reported a progressive improvement in the qualifications of available staff. The shortages were most acute at the primary and high school levels. Many high schools were able to operate only through extensions of teaching authority. Boards tried to overcome staff shortages by:

1. bursary programs
2. centralization of school facilities
3. recruitment of qualified married women
4. use of bonuses, either monetary or subsidized living accommodation
5. recruitment of teachers from outside Alberta
6. extension of teaching authority.

II. ORGANIZATION OF SCHOOLS

A. Adequacy of Organization

1. Wide variation existed in the sizes of schools and breadth of high school programs offered. Some boards were able to offer only a limited academic program supplemented by correspondence courses. Others provided matriculation, general, business and vocational programs.

2. School officials were aware of the need for varied high school programs and tried to provide these through:

1. the employment of high school supervisors
2. the use of travelling teachers
3. addition and extension of industrial arts and home economics
4. extension of libraries and librarian services
5. vocational courses
6. centralization of services.

3. The effect on rural students of increased opportunities for vocational education is as yet slight. Some boards assisted students to attend vocational high schools by means of boarding and tuition grants but expressed concern at the limited response. In a few areas the number of students who attended vocational classes lessened the public pressure for expanding the facilities of small high schools. In those districts where vocational schools exist the entire high school offerings were modified and extended. Since vocational and technical education is still relatively new, many superintendents reported difficulty in estimating its over-all effect.

B. School Buildings

1. There was general agreement among school superintendents that new buildings should be flexible in design so as to provide instructional areas suitable for varied programs, new methods of instruction and variety in the grouping of students. Better science rooms, libraries, lunch rooms, fine arts rooms and additional storage space should be included in new construction. Some superintendents stated that approval of building plans should depend on prior approval of the program to be offered in the school. It was suggested that portable classrooms should be used to relieve pressures for small high school buildings in those areas where the further centralization of high school facilities was still possible.

2. During the past year the superintendent's role in planning new buildings was that of innovator; consultant with teachers, boards and architects; co-ordinator of planning and, in some cases, executive officer of the board.

3. Wide differences existed in the need for new buildings. Areas of expanding population reported extensive need, whereas those with stable or declining population indicated little need for additional schools. Agreement was expressed that old frame structures built early in this century needed to be replaced.

III. SPECIAL SERVICES

A. The services provided by assistant superintendents and special supervisory personnel differed only in degree from many of the services provided by superintendents. Classroom visits, vocational education, music, speech therapy, book rental management, library supervision, physical education programs and in-service programs were included in the supervisory duties of such personnel. Occasionally supervisory work was combined with part-time teaching duties. Supervisory staff worked under the direction of, and in co-operation with, superintendents to provide extended and more detailed assistance to teachers and boards. Superintendents commended this contribution to the improvement of educational offerings in the schools. Many counties and divisions provided no additional supervisory services.

B. Except in some northern districts and a few irrigated farming areas in the south of the province pupil attendance was not a problem for school authorities. The holding power of the high school increased and this was especially apparent where the centralization of high school facilities or the establishment of vocational schools permitted a wide program of studies to be offered. Lack of employment combined with a growing public awareness of the value of high school education were also considered to be contributing factors in keeping students in school.

- C.** Superintendents reported that boards were accepting the importance of adequate library services for schools. Many jurisdictions established policies aimed at providing central libraries in all schools, full or part-time librarian services, and increased grants for the purchase of books. In a few cases centralized library services were provided in co-operation with regional library systems, proving to be of excellent value. Some districts, being unable to find suitably trained library personnel, set up bursary programs for teachers interested in getting specialized training. In-service programs were developed to assist all teachers to make better use of the available library resources. Grants for the purchase of books were reported varying from \$1.75 to \$8.50 per student.
- D.** Opportunities for students of above average ability and for slow learners were provided in a variety of ways. Enrichment programs, continuous progress plans, homogeneous grouping and opportunity classes were among devices employed to differentiate instruction. Remedial classes were established for those students who needed special assistance to carry them through the regular school program.
- E.** Guidance and counselling services were provided by specially trained personnel in larger high schools, but the responsibility for such services in other schools rested largely with the principal and teachers. Superintendents expressed appreciation for the fine work done by the Provincial Guidance and Psychological Services but noted that a need existed for trained staff at the school level to work in association with clinical staff. These specialists were needed to make certain that recommendations made by guidance personnel were carried out in the classroom. Occasionally liaison committees comprised of principals and teachers worked directly with guidance personnel in case work. Need was indicated for more trained counsellors especially for junior high and senior high school students.
- F.** Many teachers participated enthusiastically in experimental programs of instruction. Innovations, new equipment and new instructional practices frequently referred to included these: programmed instruction, team teaching, televised instruction, special reading classes, language laboratories, continuous progress programs, group evaluation, opascopes, tachistoscopes, overhead projectors and modification of mathematics courses. Where these were used in planned sequence all significantly improved the standards of instruction.

IV. INSPECTION AND SUPERVISION

- A.** In-service projects of many types were carried on during the year. These included projects in enterprise, spelling, language arts, mathematics, evaluation and measurement, music, drama, oral French, team teaching, speech therapy,

action research. Several counties reported special projects in group inspection and evaluation at both high school and elementary levels. Area testing continued as an important in-service activity.

- B.** Classroom visitation, combined with individual and group conferences, was considered to be the most effective means of improving instruction by all superintendents. This basic supervisory technique was supplemented by institutes, seminars, work with the principals' associations and a variety of staff projects. Classroom visiting provided insight into instructional problems, established rapport with teachers, opened avenues for assistance and permitted inspection for certification. Group supervision encouraged the exchange of information, group experimentation and staff involvement in solving instructional and administrative problems. It also provided an excellent means of initiating and directing in-service education. Seminars carried on by the university and/or the A.T.A. were effective in-service projects and a number of boards encouraged teachers to attend these by payment of fees and other expenses. Institutes and small conferences and study groups were popular in-service activities. Continuing education of teachers is considered to be of great importance if the standard of education in the schools is to be maintained.

C. Physical Education

Considerable variation in the standard of instruction provided in physical education was evident throughout Alberta. Some teachers provided instruction limited to games and competitive sports; many teachers organized a structured sequence of activities aimed at developing a sound physical education program. Skills, rhythmic drills and games, calisthenics and competitive sports were used as means of accomplishing the aims of the course. Some boards employed specialists to supervise and teach. Many superintendents reported that special improvement had been made in the junior high school grades. This development was attributed to better qualified teachers, additional gymnasias, more and better equipment and continuing in-service programs.

D. Literature

In the field of literature there was also considerable variation in the standard of instruction. Some teaching of a superior or satisfactory standard was reported, but many superintendents considered instruction in literature to be of mediocre quality. Reading skills at the elementary level were often stressed almost to the exclusion of literary appreciation. Elementary readers were not considered by some superintendents to be adequate for the teaching of literary appreciation. At the junior high school level many teachers stressed the mechanics of study-memorization of authors and themes, summaries, etc., with little emphasis on appreciation and creative writing. Limited library facilities sometimes hin-

dered an extension of student activities beyond study of the text. Teachers in departmentalized schools were often unwilling to accept a teaching assignment in literature because they considered their own background to be inadequate. Wherever teachers were enthusiastic and conversant with the aims of the literature program excellent results have been achieved. The teacher guides in the elementary grades were commended as resource materials.

Other subject areas in which instruction was commended frequently included mathematics, science, social studies and language. There was considerable agreement that the fine arts needed more emphasis in the schools.

V. LIAISON WITH OTHER DEPARTMENTS

Liaison with other governmental departments and agencies was harmonious. Satisfaction with the county system, as a unit of government, continued to grow. School boards expressed satisfaction with the services received from the many branches of the Department of Education. Superintendents commented on the excellent assistance provided by the Department of Health and Welfare, the Department of Highways, the Department of Agriculture, the Highway Traffic Board, the Recreation and Cultural Development Branch of the Department of the Provincial Secretary, the Family Allowances and Indian Affairs Branches of the Federal Government.

VI. SIGNIFICANT DEVELOPMENTS

Significant developments not considered elsewhere in this report included:

- (a) centralization of high school services
- (b) establishment of vocational schools
- (c) integration of Indian students with the public schools
- (d) establishment of adult education programs
- (e) closing of one-roomed schools
- (f) extension of school facilities (plant and equipment)
- (g) establishment of private kindergartens.

REPORT OF INSPECTORS OF HIGH SCHOOLS

(Consolidated by R. C. Ohlsen)

A. GENERAL CONDITIONS

Regularity of Service, Supply and Quality of Teachers:

High schools throughout the province continued to offer regular service during the year, although in some isolated areas it was found impossible to secure high school teachers and other provisions had to be made. Generally speaking, the shortage of high school teachers in the province persisted. These facts gave evidence of this: the many extensions of teaching privileges, the importing of teachers into the province, and the employment of teachers with limited capacity. On the whole, recent recruits to the profession from the Faculty of Education possessed a good knowledge of the content and objectives of their specialization. Unfortunately, however, there are still many teachers working in high school classrooms who have had long experience and considerable training but who offer ineffective service.

B. ACCOMMODATION, EQUIPMENT AND ORGANIZATION OF HIGH SCHOOLS

New Schools, Additions and Renovations:

The new high schools are becoming much more functional. Consideration is being given to the use of specialized areas. In particular, administrative areas, staff rooms, suites of rooms for special subjects and laboratories have been designed to meet instructional objectives. The vocational high school, with its generous financial support, has apparently stimulated this change in building design.

There was a trend towards improving the space for libraries. Administrative officials have become increasingly aware of the necessity of improving library services. Additions and renovations to buildings provided for many of these new features, such as laboratories, libraries, etc.

Serious consideration was given to the health needs of students in that the building design provided for more uniform heating and, in some schools, air conditioning. The experiment with the windowless school in Jasper Place will be followed closely.

Equipment:

Most of the high schools in the province are equipped with such basic technological aids as motion picture projectors, film-strip machines, tape recorders and record players. In some schools the overhead projector forms part of the equipment while practically all teachers have access to duplicating machines.

Two special pieces of electronic equipment were found in some high schools in the form of the language-laboratory and

the shorthand-laboratory. Considerable experimentation has gone into the use of the language-laboratory and it would appear that its use will become universal. It is as yet too early to assess the value of the shorthand-laboratory. Experimentation continues in the field of television.

Laboratories are much better equipped in order to provide students with the opportunity to experiment in the field of science. Differentiation was evident between physics, chemistry and biology. General equipment, such as globes, maps, charts, etc., have been found in sufficient quantity and allocated in a fashion that facilitates their use.

Organization:

There have been no major changes in the organization of high schools. In a few rural areas small high schools located at reasonable distances from one another have divided the program so that one school offers the academic electives and the other the general electives. There was continued use of travelling specialists. Timetable changes in some large urban schools provided for the 6-period day in a 4-day block arrangement to give longer class periods.

As high schools grow in size, there is a definite trend to decentralize administrative duties. Assistant principals, department heads, guidance personnel and subject-area co-ordinators have been appointed in many larger schools. Appointment of such personnel has not always improved the service to the students and teachers. There appeared to be a need for a careful analysis of the function of special officers so as to produce optimum benefits.

C. SUPERVISION OF INSTRUCTION

Shorthand:

Shorthand received more attention than it had in the past, and many of the problems attendant on its inclusion in a secondary program were given serious study. A vocational orientation was evident, although appropriate guidance procedures have not kept pace. The shorthand-laboratory was introduced by some school systems and may prove to be a useful mechanical device with which to build speed. Most of the high schools offering shorthand have ample equipment and reference material to carry on a suitable program.

Mathematics:

During the year the revised Mathematics 10 course was put into effect. To clarify the basic objectives of this course, there was need for further in-service work. Large city systems have embarked on four-year programs in academic mathematics in the hope that by taking less each year the students could cover the course with greater thoroughness. The choice of candidates for these programs did not give sufficient recognition to student achievement in Grade IX.

Science:

There was considerable activity throughout the province in both physical science and chemistry. Experimental programs were continued in these two fields and considerable in-service work was being done. Much good teaching in the field of science was observed. Responsibility for the teaching of science was, by and large, assigned to those teachers with academic competence and personal interest in the subject.

In the field of biology, an increasing number of schools offered Biology 20 with the intention of introducing the Biology 20-30 sequence as part of the matriculation requirement. Some lack of laboratory equipment was noted for this discipline.

English:

The need for improvement in the teaching of English was apparent. For the most part, English instruction followed the textbook closely with insufficient use of supplementary materials. Some teachers misinterpreted the objectives of the new English 10 course. In certain schools where students were divided into classes on the basis of academic and diploma courses, differentiation of instruction was not fully realized. In some schools subject co-ordinators and department heads, through study projects, sought to clarify objectives and to improve classroom practice. The English Council did admirable work with its members.

Social Studies:

There were commendable examples of effective instruction in social studies where teachers demonstrated academic competence and appreciation of those course objectives pertaining to analytical reading, critical reasoning, and purposeful discussion; other teachers showed a high regard for the achievement of pupils in informational content. Improved physical accommodation has provided better opportunity to make use of supplementary material and audio-visual aids.

Teachers in many schools benefited from the supervisory leadership of department heads, from staff projects, and from other features of in-service programs. In a number of centers, professional literature provided a basis of discussion at group meetings. Greater use was made of resource personnel in workshops, seminars, and institutes.

Membership in the Specialist Council on Social Studies provided an opportunity for many teachers to consider new ideas pertaining to teaching procedures, use of various aids, and treatment of current events.

**D. SIZE, ADMINISTRATION, AND INSPECTION OF
HIGH SCHOOLS****The Small High School:**

The small high school continued to operate in many parts of the province; problems attendant on its operation were similar

to those of the past. It was difficult to secure staff and to retain their services. The teachers were required to instruct in a range of subjects with perhaps little training in some. Administrators and school board members have become increasingly aware that this type of school has not met the needs of its student population.

The Larger High School:

Larger divisional high schools are more common in most counties and school divisions. These schools have a diversified program and sufficient staff members to enable some degree of specialization. Where geographic conditions made it possible, authorities moved in this direction, with the result that the smaller high schools have decreased in numbers. In some counties and school divisions the vocational school, built under the terms of The Technical and Vocational Training Agreement, has become the pattern for the extension of the composite plan; while in others the large divisional high school has a vocational wing attached to it.

Accreditation Survey:

During the year the high school inspection staff carried out a survey to determine whether or not the Calgary Public School System should be granted accredited status. The Calgary survey was unique in that it covered the entire range of school operation. Administration, both central and school, physical plant, equipment, guidance and instruction were studied at all grade levels. The personnel of the survey team included not only inspectors of high schools but city and university personnel as well.

E. INSPECTORS' SUPERVISORY ACTIVITIES

High school inspectors worked closely with staffs of schools, institutes, principals' meetings and meetings of superintendents in an effort to carry out supervisory duties. The basic activity is still the classroom visit, followed by a meeting with the staff. Attendance at institutes provided an opportunity for in-service work. Meetings with principals' associations assisted in serious discussion of improved administrative techniques. Teams of inspectors visited several large divisional high schools during the year, and other self-evaluation projects would have been carried through had it not been for the Calgary survey.

F. NON-SUPERVISORY ACTIVITIES

The following list of non-supervisory activities in which high school inspectors were involved indicates the wide variety of duties of this kind which they were called upon to perform:

1. Member of the Senior High School Curriculum Committee.
2. Member of subcommittees of the Senior High School Curriculum Committee (English, French, Mathematics, Biology, Social Studies, Physical Sciences, Business Education, Programming).

3. Member of the High School and University Matriculation Examinations Board.
4. Member of committees for setting and for revision of Grade XII examinations.
5. Member of the Business Education Advisory Committee.
6. Chairman, Provincial Accreditation Committee.
7. Member of the High School Entrance Board.
8. Departmental representative on the Peace River District Planning Commission.
9. Speaker or panel member at various conventions, institutes and conferences (e.g. Alberta School Trustees' Convention, Specialist Council Conferences, Canadian Education Association Convention in Edmonton, Conference on the Canadian High School).
10. Member of educational survey and investigation teams.
11. Speaker at various Home and School Association meetings.
12. Speaker at graduation exercises.
13. Departmental representative at official school openings.
14. Investigation of personnel problems and disputes between teachers and school boards.
15. Assistance to school boards in planning new schools and facilities.

TABLE I
TIME SPENT IN DIFFERENT TYPES OF DUTIES
BY INSPECTORS OF HIGH SCHOOLS*

	Days	Average
(a) Inspection	293.50	45.15
(b) Group supervision and research	105.00	16.15
(c) Conventions and institutes	116.50	17.92
(d) Investigations, surveys, and public meetings	109.00	16.77
(e) Office work: reports, correspondence and Form A Cards	654.00	100.62

*The urban count includes the following cities: Edmonton, Calgary, Lethbridge, Medicine Hat, Red Deer, Grande Prairie, Wetaskiwin, Camrose, Drumheller.

REPORT OF THE HIGH SCHOOL INSPECTOR OF VOCATIONAL EDUCATION

(R. H. Cunningham)

The Technical and Vocational Training Agreement of 1961 made possible the development of strong vocational programs at the high school level. The large number of school boards wishing to take advantage of this opportunity to broaden the educational offerings in their area necessitated the appointment of a high school inspector who would be responsible for the development of vocational education programs. These responsibilities include the development of vocational courses, assisting school boards in planning facilities and equipment, cooperating with academic curriculum sub-committees in the development of related subject courses, insuring the adequacy of the qualifications of the teachers, supervising vocational teachers, and cooperating with the Apprenticeship Board and the technical institutes in developing and maintaining articulation of programs.

A great deal of time was spent checking equipment lists to insure that they were adequate to teach the courses. A special equipment list was prepared for a basic machine shop for those schools that wished to offer Drafting 22 and 32 and did not have a machine shop in which to offer the related machine shop course. An extensive library list of technical books was prepared to assist vocational schools to build up an adequate library under the federal-provincial agreement. After many meetings, clear statements on the articulation of high school vocational programs with the apprenticeship training programs and certain technological programs at the institutes of technology were obtained. The following curriculum sub-committees met to revise the curriculum guides prepared last year: Mathematics 12, 22, 32; Automotives; Carpentry; Drafting; Electronics; Beauty Culture; and Electricity. In addition, a sub-committee on Auto Body 12, 22, 32 was set up and work started on the development of a curriculum guide.

The following high schools offered vocational courses in Grades X and XI: Victoria Vocational High School, Jasper Place Composite High School, Grouard Vocational School, James Fowler High School, Ernest Manning High School, Bowness Composite High School, Medicine Hat Composite High School, Red Deer Vocational High School, St. Joseph's Vocational High School, Camrose Composite High School, Grande Prairie Vocational High School, Wm. E. Hay Composite High School and Drumheller Vocational High School. (Does not include those offering vocational business education only.) In addition some of the composite high schools offered vocational courses at the Grade X level as feeder schools to the above mentioned schools.

At least one administrative visit was made to each of the above schools in connection with their program and equipment. These were followed by supervisory visits with individual instructors at a later date.

New vocational facilities are being planned for Harry Ainlay Composite High School, Wetaskiwin Composite High School, Vegreville Composite High School, Ponoka Composite High School, Western Canada High School and Crescent Heights High School, and St. Paul High School.

An adequate supply of competent vocational teachers is being provided under the bursary program at the Faculty of Education, Vocational Education Department in Edmonton, in all areas with the exception of Food Preparation and Welding. School boards have had little success in obtaining suitable candidates for teaching in these two areas.

A major problem at the moment is how to extend the opportunities for vocational education to students in the smaller centers and more sparsely settled areas of the province.

STATISTICS

II. INSTRUCTION

A. Elementary Schools

(i) Mathematics

Superintendents of urban and independent districts reported that the new program in elementary mathematics

was in general use up to grade four in most schools, with several systems offering this course at the grades five and six levels as well. The program has been well accepted by teachers (except for a small minority group) as well as pupils, and earlier apprehension on the part of parents has been largely overcome. Carefully planned in-service education of teachers has resulted in improved instruction, and achievement was reported to be high. The use of teaching aids has resulted in better understanding of mathematical concepts; meaningful drill has maintained computational skills, and less involved procedures in problem-solving have motivated pupils and made the course more interesting.

(ii) Language

Superintendents reported a generally high standard of language instruction. In the primary grades, oral work received major emphasis in most schools, and interest was maintained at a high level through dramatization and the use of such aids as tape recorders and film strips. In grades four to six, skill in oral work was improved by pupils' reports to the class, as language was integrated with other subjects. At this level, more written work was introduced, with emphasis on pupils' creativity.

(iii) Other Areas

The use of standardized tests helped teachers to diagnose strengths and weaknesses in reading, and resulted in differentiated instruction. A large variety of reading materials was used, both for remedial purposes and for developmental reading. Recreational reading was encouraged, and progress was reported to be satisfactory.

Instruction in physical education was reported to be satisfactory in some systems but less so in others. Since few systems employed specialists in physical education at the elementary level, regular classroom teachers were largely responsible for this instruction, and many of these were neither qualified nor inclined in this direction. The program was chiefly one of organized games during physical education periods, supplemented by such extra-curricular activities as track and field and other sports. Some systems offered in-service education programs in an attempt to improve instruction.

Consultants, travelling teachers, school broadcasts and music festivals were all instrumental in keeping instruction in the fine arts at a high level.

Oral French at the elementary level was continued in some urban centers and introduced for the first time in some others.

B. Junior High Schools

(i) Physical Education

Instruction in junior high school physical education was reported to be superior to that at the elementary level,

since most systems employed specialists in the field for this age group. The main problem was a shortage of qualified female instructors for girls' classes. The emphasis was on organized seasonal games, with house-leagues given more attention than inter-school competition, particularly in the smaller systems. Academic teachers generally assisted physical education instructors in the supervision of extra-curricular activities.

(ii) Literature

The effectiveness of instruction in literature varied considerably from school to school, depending upon the teachers' background, enthusiasm and interpretation of the objectives of the course. Where satisfactory instruction was given, the teachers stressed appreciation as well as comprehension, while a purely mechanical approach was employed by teachers who lacked the qualifications necessary to inspire their students and to make the study of literature an enjoyable experience. Improved library facilities resulted in somewhat better reading habits, but several systems reported a lack of student interest in reading.

(iii) Other Areas

Instruction in subject areas other than those reported above was generally satisfactory. Greater emphasis on the experimental approach to science and better use of reference materials in social studies were problems receiving some attention. While the new course in junior high school mathematics had not yet been introduced, some systems reported that preparatory work was conducted in this field. The proposed multi-unit industrial arts shops were not in general use, but were anticipated with interest. The fine arts were given satisfactory attention, with some larger systems conducting elaborate curricular and extra-curricular activities, although some superintendents reported lack of student and teacher interest. Success in oral French depended largely upon the availability of well qualified teachers.

(iv) Policies with respect to Organization of Junior High Schools

As junior high schools have been separated from elementary schools and centralized to serve larger areas, departmentalization has become a regular feature of organization. Grouping according to ability has become common, with several systems reporting special enrichment and remedial classes and some systems offering pre-employment classes. Enrichment classes were reported the most difficult to administer, as teachers generally strove for complete student-mastery of prescribed subject matter rather than opening wider fields of study. Where scheduling permitted, some experimentation in team teaching was attempted. One system reported a deviation from normal scheduling in order to make the time-table more flexible. Another emphasized blocking of mathematics-science and English-social studies

courses. A variety of means were used to organize schools for maximum achievement.

C. Senior High Schools

1. Effectiveness of Instruction

(i) Fine Arts

Enrolment in fine arts courses varied greatly from system to system. Limiting factors reported were size of student body and availability of instruction facilities and staff. The larger systems offered a variety of courses, and reported good co-operation among art, drama and music departments. Smaller systems limited the offerings, but reported enthusiasm on the part of both teachers and students, resulting in a high standard of achievement. Most schools combined formal instruction with extra-curricular activities, and such functions as drama and music festivals served to motivate participation and efforts.

(ii) Social Studies

A more adequate supply of well qualified teachers revitalized instruction in social studies, and motivation of students was reported to be greater than in previous years, except at the grade twelve level where non-matriculation students were reported to have lost interest. The stereotyped lecture method of instruction had been largely replaced by more emphasis on discussion of current events, class projects and field trips. Good use was made of audio-visual equipment and reference material, and achievement was reported to be of good standard.

(iii) Other Areas

Reports indicated that some changes took place in other subject areas. For lack of qualified instructors, business education programs were restricted to typewriting in smaller systems. The introduction of Biology 30 sharply reduced the number of students enrolled in Biology 32 in some schools. The use of language-laboratories revitalized interest in French since the emphasis was shifted to fluency of speech rather than on drill in formal grammar. With one exception, superintendents reported no loss of skill in French structure as a result of such change in instruction. In mathematics, traditional teaching was supplemented by programmed instruction and enriched through library resources in one school. English instruction was up-graded in one system by a planned program of integration with other subjects and by the use of tape recorders.

2. Major Problems in Secondary Education

The most commonly reported problem at the secondary level centered around the effort to reduce the percentage of "drop-outs" by providing varied programs and motivating students. Small urban systems reported that limited programs offered in their schools were responsible, but larger systems with broad curriculums reported that the indifferent

student was not motivated by a wider choice of subjects, but continued to drift along with a minimum of effort. Lack of parental support for the schools, and a preference for academic courses regardless of students' aptitudes complicated the school's problem of providing programs suitable for all students. Counselling students was often made difficult by parents' preconceived plans for their children.

Poor reading ability was listed as a major problem in one school, as this deficiency adversely affected the students' progress in all courses.

Staffing the schools with well qualified teachers remained a major problem, particularly in the fields of languages, business, vocational and physical education.

3. Public Relations

Some school systems reported that no organized public relations program existed. Others made use of the following to keep the public informed:

- (i) Home and School Associations
- (ii) Students' Union activities which were open to the public, and publication of a school newspaper
- (iii) Press releases to newspapers
- (iv) Open house during Education Week, parent-teacher and parent-counsellor conferences
- (v) Providing speakers for service clubs and other community organizations.

One school reported that the most effective public relations program was still the operation of a good school system.

4. Supervision of Instruction

Although some urban superintendents still assumed duties as supervisors, most of the larger systems delegated supervisory duties to co-ordinators of elementary and secondary education, special subject supervisors and principals. Methods employed were as follows:

- (i) Classroom visitation to individual teachers
- (ii) Staff meetings
- (iii) Principals' Association meetings
- (iv) Workshops, seminars and special meetings of teachers
- (v) Self-evaluation projects
- (vi) System-wide testing
- (vii) Teachers' inter-visitation

One system reported that principals are now charged with the responsibility of writing formal reports on teachers

in order to assist the superintendent in recommending permanent certification.

5. In-Service Activities

In-service activities continued to play an important role in programs of up-grading instruction. Media employed for this purpose included:

- (i) Internship program
- (ii) Orientation meetings with new teachers
- (iii) Teachers' conventions
- (iv) Seminars, institutes and meetings with special consultants
- (v) ATA specialist councils
- (vi) Non-credit university courses
- (vii) Special study groups
- (viii) Monthly curriculum committee meetings
- (ix) Self-evaluation projects
- (x) Classroom inter-visitation
- (xi) Professional bulletins and publications
- (xii) "Six-School Project"
- (xiii) One large system had a special in-service program consisting of 15 classes in each of twelve courses.

III SPECIAL SERVICES

A. Health Services

Health services were provided through health units, city health departments, or locally employed medical and dental officers and nurses. Included in these services were physical examinations, immunization programs, tuberculosis surveys, health education and conferences, home visiting, distribution of vitamins and referrals of special cases to doctors, dentists and the provincial guidance clinics. In suspected cases of communicable diseases, health authorities occasionally excluded students from school attendance.

B. Transportation

Depending upon the size of the district, provision for transportation varied from nil to regular school bus routes. One system provided taxi service for special cases; another provided bus tickets for pupils coming from a distance, and one had contracted with a commercial bus company for transportation of pupils. Some systems paid an allowance in lieu of transportation.

C. School Libraries

Library services showed continued improvement during 1963-64, but the extent of such services varied greatly from system to system.

Central school libraries were common in junior and senior high schools, but limited space and a shortage of trained personnel restricted their usefulness. Where qualified persons were available, their library duties ranged from part-time to full-time, and some classes had regularly scheduled library periods. Other schools made library operation a joint staff project, some using students for clerical assistance, particularly where library clubs were organized.

At the elementary level, some large systems used book-mobile service; some had centralized libraries, while others had classroom libraries only, administered by the home-room teachers. Some systems reported in-service projects in the use of libraries.

Depending upon available space, libraries ranged from mere stackrooms to instructional materials centers. Stocks varied from inadequate to excellent, and annual allotments were reported from \$1.50 to \$3.50 per student. Some systems allowed special grants for new rooms. Stocks consisted of fiction, reference books, professional publications and periodicals, as well as records, films and other teaching aids. In some high schools, the libraries were open to students before and after, as well as during school hours. Some systems reported excellent co-operation from public libraries in their districts.

D. The Education and Care of Exceptional Children

Some provision for the education and care of exceptional children was made in nearly all systems. Where the number of such pupils was too small to warrant special classes or facilities, agreements with larger neighboring systems generally took care of their needs. In the smaller systems, remedial classes and opportunity rooms with low enrolments were common, while the larger systems provided such services as schools for retarded children, pre-employment classes and other modified programs. Only the large cities provided such services as special classes for the emotionally disturbed, speech therapy classes and classes for cerebral palsy cases. One large system also reported special adaptation classes for students of average or better ability who were marked underachievers, home and hospital instruction and detention home teaching.

E. The Use of Television and Programmed Learning

Neither television nor programmed learning was in general use in the schools during the year, but interest appeared to be increasing in these media of instruction. Oral French programs were produced in one large city, and

some systems reported participation in telecasts on map-reading, music, art, enterprise, science and mathematics. The limited range of television stations precluded the use of telecasts in areas remote from the major cities.

Programmed learning received limited use for enrichment and remedial purposes, and some experimentation was carried out with this innovation.

IV. INDUSTRIAL EDUCATION

Industrial education continued its expansion during 1963-64, and many systems reported plans for further expansion in 1964-65.

In industrial arts, multiple-unit shops were introduced in some systems and were planned for the near future in others. Unit areas included ceramics, woods, metals, plastics, graphic arts, electricity-electronics, computers, power mechanics and graphic communications, all as exploratory courses.

In some vocational-academic high schools, industrial electives had almost disappeared in favor of vocational education courses. Some systems reported that vocational facilities were taxed to the limit, so that additional space and equipment must be provided to meet increasing demands. While enrolments were high in all areas, business-vocational courses attracted the largest numbers.

Several systems without vocational schools of their own, provided financial assistance to students attending such schools in neighboring systems.

V. SIGNIFICANT DEVELOPMENTS OTHER THAN ABOVE

In addition to the topics discussed above, superintendents reported the following significant developments in their systems:

1. Increased interest in evening classes in high school, vocational and adult courses.
2. Improved guidance programs.
3. Special provision for gifted children.
4. Successful internship programs.
5. Introduction of ungraded rooms for slow learners.
6. Introduction of continuous progress plans in more systems.
7. Additional facilities for business education, although a shortage of qualified teachers in this field somewhat restricted the program.
8. Introduction of kindergartens as part of the regular school system.
9. Coaching schools in August to prepare grade twelve students for supplemental examinations.

Most systems appeared to be exploring every avenue to make the instructional program as effective as possible, and progress appeared to be satisfactory.

REPORT OF THE SUPERVISOR OF HOME ECONOMICS

(Miss A. Berneice MacFarlane)

Programs

A revision of the program of studies in Home Economics for the Senior High School has been completed and will be in use after September 1st, 1964. A new course, Home Economics 21—Home Living, stresses the dual role of homemaker and wage earner.

Textbooks have been authorized for the first time in Foods and Nutrition 10, 20, and 30 and Home Economics 21—Home Living.

The supervisor has given assistance in the development and supervision of the Vocational High School programs in Food Service and Beauty Culture.

Instruction

The situation with respect to the supply of instructors continued to be difficult, nineteen of whom taught with a Letter of Authority. Teachers continued to improve qualifications through summer sessions, evening credit programs and attendance at Specialist Council sessions. The effectiveness of the program reflected favorably upon the conscientious and worthwhile instruction offered.

Education Conferences

The supervisor attended the Tenth International Congress on Home Economics at the Sorbonne University in Paris, France, in July and the Twelfth Annual Canadian Education Association Conference at Banff in May. The professional knowledge, and experiences gained were shared with the provincial home economics teachers through newsletters, discussions, speeches at conventions, and workshops.

General Observations

The supervisor of home economics is concerned with the encouragement and facilitation of effective instruction and the development and full use of adequate physical facilities, through consultation, school visits, attendance at meetings, distribution of newsletters, library lists and teaching aids, and providing information as requested.

The progress of home economics has been satisfactory and is contributing to the general education of girls in a practical way.

Extension of Services

New centers were established at: Calgary Public (Dr. Oakley and David Thompson Junior High Schools, James Fowler Junior-Senior Vocational School and Ernest Manning Vocational High School), Edmonton Separate (Austin O'Brien High School) Airdrie,

Coleman, Stony Plain Junior High, Grande Prairie (Montrose Junior High School), Jasper Place (Hillcrest Junior High School).

New accommodation was provided at: Bowness—2nd room, Donalda, Drumheller Vocational High School, Grouard—2nd room, Olds—2nd room, Myrnam, Rimbey, Rocky Mountain House, St. Albert (Paul Kane and Vital Grandin), Two Hills.

Centers reopened were: Athabasca, Elkpoint, Winfield.

Centers closed were: Caley, Blackie, Okotoks Circuit, Drayton Valley.

School Dormitories

Grande Prairie continued to operate a dormitory for thirty-five pupils. The charge was \$45.00 per month, not including weekends.

New dormitories were opened in Drumheller and Grouard. In Drumheller the fee was \$60.00 per month not including weekends, and the enrolment varied from forty-one to fifty-one. In Grouard the fee was \$65.00 with an enrolment of fifty-two. Worthwhile service was rendered in all dormitories.

STATISTICS RELATING TO SUPERVISOR'S ACTIVITIES

Administrative and supervisory visits to schools	145
Conferences and committee meetings	53

STATISTICS RELATING TO SCHOOL OPERATION

Number of home economics rooms	295
Number of circuits	9
Number of home economics centers on circuits	22
Number of Indian schools	4
Number of private schools	2
Number of instructors	283
Number of dormitories	3

In special classes	445
In Grade VII	2,171
In Grade VIII	8,014
In Grade IX	7,295
In High School	7,440
In Grade IX Correspondence Course in Home Economics	11
In Needlework Correspondence Course	67
In Foods and Nutrition Correspondence Course	227
TOTAL Enrolment	25,670

REPORT OF THE SUPERVISOR OF INDUSTRIAL ARTS

(J. D. Harder)

(a) Curriculum

The Junior High School Curriculum in Industrial Arts was revised. The major changes involved adding more areas for exploration and more standardization of content in each unit. The curriculum committee recommended the reorganization of shop layouts to facilitate a multiple-activity program within a single comprehensive laboratory.

(b) Supervision

It was possible to visit only about one-third of the instructors and these only once. It was apparent that many instructors needed and wanted assistance with the improvement of their instructional programs.

(c) Specialist Councils

The Industrial Arts Specialist Council has been very active in the past year with meetings in each region, a three-day seminar in the fall and a two-day conference in April. The Council has contributed much in providing a forum for the discussion of problems common to all instructors. The supervisor worked closely with the councils in planning conference programs and in serving as a speaker and consultant at their meetings.

(d) Administration

The revised program has resulted in a renewed awareness of the potential of industrial arts as a very vital part of general education. This interest is being translated into reality. The supervisor spent considerable time in working with school boards in the re-planning of existing facilities, to make them more functional, and in the planning of new industrial arts laboratories.

New equipment lists were prepared for each unit of the revised program.

A new list of audio-visual aids materials was compiled as well as a list of reference books for each unit in the junior high school program.

The supervisor spoke to superintendents' zone meetings, school boards, trustees and Home and School Associations on the industrial arts program and its development.

Two newsletters were distributed to all instructors and superintendents. These were used to provide information on program development, new instructional material and current items of interest in the industrial arts field.

STATISTICS

1. Supervision Activities

Administration and supervisory visits to schools	107
Meetings with school boards and zone meetings	25
Conferences and committee meetings	48

2. School Operation

Number of industrial arts shops	242
Number of industrial arts shops combined with vocational education shops	67
Number of circuits	13
Number of shops on circuits	30
Number of shops closed or remaining closed	25
Number of instructors in industrial arts only	228

OFFICE OF THE REGISTRAR

(J. I. Sheppy)

The office of the Registrar functions primarily as a certification bureau for teachers employed in the Alberta school systems.

The chief duties of the office are as follows:

1. Issuing certificates of qualifications to teach.
2. Administering the regulations governing the certification of teachers.
3. Assessing the credentials of applicant teachers from outside Alberta.
4. Maintaining records of the professional standing and teaching service of each Alberta teacher.
5. Issuing Professional statements.
6. Evaluating foreign secondary school documents.

The Registrar is Secretary to the Board of Reference and to the Board of Teacher Education and Certification. During the past year he was chairman of the Chartered Accountants' Experience Appraisal Board.

General Teacher Certification

The number and classes of general certificates issued to teachers during the past year are given in Table I below. Section (a) of the Table provides data regarding permanent certificates, and section (b) figures for interim certificates.

TABLE I

Board of Reference

Two applications for Board of Reference were received and both were heard by Chief Judge Nelles V. Buchanan. In one case the termination of contract was confirmed; in the other, disallowed.

Board of Teacher Education and Certification

The Board of Teacher Education and Certification advises the Minister of Education and the President of the University of Alberta on matters relating to the training and certification of teachers. It is composed of sixteen members: five each from the Department of Education and the University of Alberta; and three each from the Alberta School Trustees' Association and the

Alberta Teachers' Association. The Chairman is the Chief Superintendent of Schools.

Meetings of the Board were held on November 12, 1963 and February 10, 1964. Some of the more significant projects were:

1. Revival of the Teacher Recruitment Committee.
2. Reactivating the question of a training centre for speech therapists.
3. A study of Internship as part of the Teacher Education program.
4. A substantial study of the feasibility of introducing a three-year minimum program for the preparation of senior high school teachers.
5. Study and implementation of a program designed to up-date the academic competence of teachers.
6. Initiating the study of an "umbrella" program of teacher education for all approved teacher training institutions in the Province.
7. A study of the legal implications of a proposed screening procedure for applicants to the Faculty of Education.

Enrolments of Education Students during the Winter Session 1963-64

A total of 3,364 full-time intra-mural students were enrolled in the Faculties of Education and affiliated Colleges. In addition there were 283 registered in partial programs, 2,064 registered in the evening credit programs, and 17 registered for the Diploma in Education.

REPORT OF THE CURRICULUM BRANCH

(M. L. Watts, Director)

I. MAJOR CURRICULUM COMMITTEES

A. General Curriculum Committee

The General Curriculum Committee met on November 29, 1963, and May 27, 1964. Reports of the other curriculum committees were reviewed, with major attention again being given to that of the Senior High School Curriculum Committee. Mr. Mitchell and Mr. Cunningham reported to each meeting on developments in the technical and vocational programs. At the fall meeting it was noted that the enrolment in these programs was much higher than had been anticipated.

The members were informed of the new policy with respect to the issuing and distribution of programs of studies for the elementary school, the junior high school and the senior high school, respectively, which with the Senior and Junior High School Handbooks are to be regarded as official regulatory documents; curriculum guides, on the other hand, are to be considered non-authoritative documents providing professional advice to those teachers and administrators who wish to have it. The initial distribution of the guides is in limited quantities to administrators, with additional copies being supplied on request.

At the spring meeting, a discussion took place on programmed learning based on a report by Mr. Hrabi on a conference held in Toronto from April 1 to April 4 sponsored by the Canadian Council on Programmed Learning and on a statement by Dean Coutts on certain work being carried on in this field by Dr. Ayers. A special report was also presented by Mr. Morton dealing with the reorganization of the Audio-Visual Services Branch and major developments in the field of educational television and other electronic and mechanical devices which he predicted must soon be looked upon as integral parts of school instructional procedures.

At the fall meeting, the members expressed satisfaction at the reception given to the Curriculum Newsletter on Vocational Education in Alberta Schools issued in August, 1963 and at the spring meeting approved the plans for a newsletter on Educating Handicapped Children.

As a result of discussion, proposals were made to strengthen liaison between the University and the Department with respect to setting matriculation requirements.

B. The Senior High School Curriculum Committee

Meetings of the Senior High School Curriculum Committee were held on October 30 and 31, 1963, and April 20 and 21, 1964.

1. Technical and Vocational Courses

It was reported that the "12" and "22" courses were firmly established during 1963-64, with the enrolments taxing the facilities available, and that agreements with the Institutes of Technology and the Apprenticeship and Tradesmen's Qualifications Branch of the Alberta Department of Labour were satisfactorily completed. (The details are set forth in the Senior High School Handbook for 1964-65).

Increased attention was given to extending the range of courses in business education. Approval was given to continuing through 1964-65 the trial classes in Business Organization and Management 30 started in September, 1963. The Subcommittee on Business Education was directed to prepare Merchandising 30 as a sequent course to Merchandising 20 and to test it in several classes beginning September, 1964, to prepare course for Business Machines 22 and Business Machines 32, and to conduct an experimental class in Data Processing 32 starting September, 1964.

2. Science and Mathematics

Approval was given for conducting trial classes in Science 10 and Science 20 during 1964-65 using the texts and laboratory manuals prepared by the Chemical Education Material Study supported by the National Science Foundation of the United States. Approval was also given to trying out a revision of the material prepared by the Physical Sciences Study Committee (also supported by the National Science Foundation) in five Science 20 classes and to continue testing the unrevised PSSC material in Science 20 and Physics 30.

It was decided to compare several texts in Mathematics 32 through class use during 1964-65, and the Subcommittee on Mathematics was asked to prepare courses in Mathematics 11 and Mathematics 21 as a two-year sequence in business mathematics.

Textbooks authorized in Science and Mathematics appear in the list below.

3. English, Social Studies, Home Economics

Reading 10, a three-credit developmental reading course tried out during the year, was authorized for general use, subject to the approval of the high school inspector concerned. Interim courses in Literature 11, a three-credit course designed for the more capable students, English 23 and English 33, five-credit courses designed primarily for the diploma students, were authorized for use beginning September, 1964.

As a result of trials in Social Studies 10 classes throughout the year, a new Social Studies 10 course was approved consisting of three compulsory and two optional units. Unit One on Consumer Education and Unit Two on the Citizen and His Local Government will occupy most of the fall term, while Unit Three based on an ancient history text entitled OUR HERITAGE

FROM THE PAST written by Dr. W. G. Hardy will be the main section of the course, occupying between three and four months. Units Four and Five selected from an extended list will complete the course; students intending to proceed to Social Studies 20 will be able to select units on ancient and medieval times.

Revised courses in Home Economics 21, Home Economics 10, Fabrics and Dress 10, 20 and 30, and Foods and Nutrition 10, 20 and 30 were approved for use beginning September, 1964.

4. Program Design

On the recommendation of the Programming Committee, the new technical vocational courses were labelled "12", "22", or "32", the new diploma courses "23" or "33", and approved locally-developed courses "15", "25", or "35". To make it easier to offer courses in the fine arts, the range of their credit values was extended from 4 or 5 to 3, 4 or 5; also to facilitate scheduling the credit values of certain other courses were similarly extended.

5. Text Authorizations

The following texts were authorized for use commencing September, 1964:

1. Biology 32—MODERN BIOLOGY by Moon, Otto and Towle. Holt, Rinehart and Winston.
2. Chemistry 30—CHEMISTRY by Sienko and Plane. McGraw-Hill.
3. Home Economics, Home Living—THRESHOLDS TO ADULT LIVING by Craig, Copp Clark.
4. German 30—FOUNDATION COURSE IN GERMAN by Homberger and Ebelke, Copp Clark.
5. Mathematics II—CANADIAN MATHEMATICS by Lund. McGraw-Hill.
6. Mathematics 12—MATHEMATICS IN PRACTICE by Brown, Bridge and Morrison. Macmillan.
7. Mathematics 22—SENIOR TECHNICAL MATHEMATICS by Heywood. Macmillan.
8. Social Studies 10—OUR HERITAGE FROM THE PAST by W. G. Hardy, McClelland and Stewart. CONSUMER EDUCATION by N. E. Brown and THE CITIZEN AND LOCAL GOVERNMENT by Greason and King. Macmillan.
9. Electronics 32—PRACTICAL RADIO SERVICING by Marcus and Levy. McGraw-Hill. THEORY AND USE OF ELECTRONICS TEST EQUIPMENT. U.S. Government Printing Office.
10. Beauty Culture 12, 22, 32—PROFESSIONAL TRAINING FOR BEAUTICIANS. Milady Publishing.

C. The Junior High School Curriculum Committee

The Junior High School Curriculum Committee met on November 15, 1963, and May 25, 1964. The members approved a new health program based on the texts, HEALTH FOR YOUNG CANADIANS by Hastie, Simonson and Doherty for Grade Seven and HEALTH AND FITNESS FOR CANADIAN YOUTH by the same authors for Grade Eight, both published by Macmillan. WORLD GEOGRAPHY by Bradley (Ginn), revised to fit the Grade Nine Social Studies course was authorized, and a modernized program in industrial arts was accepted for introduction into a number of schools during the 1964-65 school year. In mathematics, in accordance with recommendations of the sub-committee on mathematics following three years of experimental work, revised editions of Book I of the following series were authorized for use in Grade Seven commencing September, 1965,

and of Book II for Grade Eight in September, 1966: **EXPLORING MODERN MATHEMATICS** by Keedy, et al (Winston) and **SEEING THROUGH MATHEMATICS** by Van Engen, et al (Gage).

D. The Elementary School Curriculum Committee

The Elementary School Curriculum Committee met on October 25, 1963, and May 11, 1964.

A new health program was developed during the year and will be used experimentally in a limited number of classrooms during the 1964-65 school year. The final edition of **The Reading Handbook** and the interim edition of **Social Studies—Enterprise Curriculum Guide** were distributed to school systems during the year. The Elementary Program of Studies was distributed to the schools in the fall of 1963. This publication now becomes the only regulatory or prescriptive statement issued by the Department of Education for elementary grades. It contains a statement of objectives, content and authorized texts. All other publications in the Elementary School such as curriculum guides and bulletins now fulfill a service type of function and their use is optional. Subcommittees to revise the art program and to evaluate and develop curriculum materials for children of Indian ancestry were appointed. The work of subcommittees in handwriting, spelling and the selection of Division II readers was approaching completion. A statement of policy for the guidance of local systems developing elementary French programs was adopted.

II. BRANCH OPERATIONS

A. Teacher Service Bureau

(N. M. Purvis, Associate Director of Curriculum)

Curriculum revision, which is the major part of the work of this office, involves the following:

1. Working with committees and subcommittees.
2. Assisting with in-service work at institutions and conventions.
3. Preparing and editing publications.
4. Providing information services.

1. Committees and Subcommittees

The Associate Director of Curriculum spent thirty-three days working with seventeen subcommittees during the year. Fifteen days were spent attending regular and special committee meetings. Extensive field work was involved in the evaluation of textbooks, courses of study and curriculum guides.

2. In-Service Work and Institutes

The Associate Director spent twenty-four days attending institutes, conventions and zone meetings of superintendents.

Introducing the new **Social Studies—Enterprise Curriculum Guide** to superintendents and discussing evaluation of readers and spellers with teachers received the major emphasis. Four days were spent as a member of the accreditation team in Calgary. Papers were delivered at the spring meetings of both the Science Specialist Council and the Council on School Administration. Six days were spent serving as consultant at the Alberta Teachers' Association Banff Workshop.

During the year the Associate Director spoke at seven meetings including Home and School, principals' organizations and teacher study groups.

3. Publications

The editing and arranging for the printing of curriculum publications was done by the Editor under the direction of the Associate Director. The following materials were handled during the year ending June 30, 1964:

(a) Elementary School

1. Elementary Program of Studies
2. A Reading Handbook (new edition)
3. Elementary Social Studies-Enterprise.

(b) Junior High School

1. Health
2. Home Economics (reprint)
3. Mathematics Bulletin
4. Program of Studies.

(c) Senior High School

1. Senior High School Handbook
2. Biology 20 (reprint)
3. Biology 32 (reprint)
4. Biology 30 Brochure
5. Chemistry 30; Science 22
6. Economics 30 (reprint)
7. English
8. English 10 (reprint)
9. Latin, French, German
10. Geography 20 (reprint)
11. Home Economics
12. Senior High School is Different (new edition)
13. Merchandising 20
14. Needlework (reprint)
15. Program of Studies
16. Psychology 20 (reprint)
17. Senior High School Science
18. Appendix to Social Studies 30
19. Sr. H.S. Social Studies 10, 20 and 30 (reprint)
20. Sociology 20 (reprint)
21. General Mechanics (reprint)
22. Metalwork (reprint)
23. Woodwork (reprint).

(d) Miscellaneous

1. Classroom Aids for Teachers
2. Commonwealth Day Publication
3. Developmental Reading Report
4. May 1st Bulletin
5. Our Provincial Government.

4. Information Services

Requests for materials and information were received from teachers, superintendents, students and parents. Letters requesting information on Alberta which have come to us from outside of the province have, at the request of the Provincial Government Publicity Branch, been sent to their offices for handling. This has reduced mailing considerably.

The requests were handled as follows:

Materials sent	1,055
Information by letter	457
Requests referred elsewhere	25
International pen friends handled	328
TOTAL	1,865

5. Library

The part-time librarian is responsible for the departmental library and assists in the evaluation of free reading and enterprise books for the elementary school.

At June, 1964, the library contained 1,730 secondary, 1,200 elementary, 1,621 professional books and 425 volumes of references, encyclopedias and dictionaries. Of these 23 secondary, 7 elementary and 101 professional books were accessioned this year. A number of out-of-date books were removed from the library. Six hundred seventy-four Industrial Arts books were added to the library and 31 of these loaned to vocational teachers since May. The library contains 175 large-type books; 83 were shipped out during the year for use of partially-sighted children.

Twenty-one professional magazines were subscribed to, 50 periodicals received and filed, 186 pamphlets classified and approximately 267 books and pamphlets were loaned. A catalogue supplement listing 62 additional professional books was sent out in October for use of superintendents.

B. Audio Visual Services Branch

(Richard A. Morton, Supervisor)

In 1964 all the services of the Department of Education related to audio visual materials and learning resources were brought together under one Branch designated as the Audio Visual Services Branch. The new Branch incorporates the former Audio Visual Aids Branch and the School Broadcasts Branch. The Branch officers include the Supervisor, R. A. Morton; the Co-ordinator of School Broadcasts, Blair Dore'; the Co-ordinator of Visual Education, Gareth Shearman; the Audio Visual Publications Editor, Ellen Watt; and the Audio Visual Assistant, John Egan. Mr. Donald Hamilton who had served the Department for many years as Supervisor of Audio Visual Aids returned to teaching in November, 1963. Mr. Robert Miller, Co-ordinator of School Broadcasts, resigned at the end of July, 1964, to go into the publishing field.

The new Branch will continue to provide certain services to the schools of Alberta including radio and television broadcasts, film materials, tape recording service, filmstrip preview service, etc. In addition, more consideration will be given to the assembling of information related to the broad field of educational resources and making available this information to appropriate persons.

In keeping with the modified role of the new Branch, a new advisory committee and two new subcommittees have been appointed. To advise the Branch on general policy, the Audio Visual Services Advisory Committee was appointed early in the spring and met on April 10, 1964. The Committee includes senior administrative personnel from Calgary and Edmonton, professors from the Faculty of Education in both cities, a county superintendent, a representative from the Alberta Teachers' Association, a school trustee, representatives from CKUA and CBC, as well as senior curriculum officials of the Department of Education. In his introductory statement to the members of the Committee, Dr. Byrne pointed out that the personnel of the new Branch would concern themselves with all aspects of instructional technology and would try to relate these to curriculum developments in the province. The members of the Committee heard reports from Branch personnel as well as brief reports from Edmonton and Calgary concerning television projects in those cities. There was discussion concerning the role of the Audio Visual Services Branch in the development of educational television. The members of the Committee agreed that the Branch must take not only responsibility for leadership but must also perform a co-ordinating function. After a study of the Film Library Report, the Committee agreed that inadequacies of the service made necessary a consideration of new policies, especially with respect to film distribution.

The Radio-Television Subcommittee met in March to consider the role of the new Branch in providing radio and television programs. Members of the subcommittee under the chairmanship of Dr. Ethel King of the Faculty of Education in Calgary undertook to study certain phases of the activities of the Branch including in-service training of teachers, tape-library resources and the problem of relating the broadcasts to the rural situation.

The Visual Education Subcommittee under the chairmanship of Dr. John Fritz of the Faculty of Education in Edmonton met in May to discuss the role of the Branch in providing film library service to the schools in the province. The members favored exploring the possibility of de-centralizing library services.

1. Visual Education

(a) Library Operation

1. Contents of Library:

	Titles	Prints	Total Prints
Sound Films	1,443	3,073	4,516
Filmstrips	3,226	1,277	4,503
2" x 2" Slide Sets	13	20	33
2. Circulation of 16mm. films:			
Average circulation per month			4,585
Highest monthly circulation (April)			5,944

3. Circulation figures for selected periods since 1945:

16mm. Films		35mm. Filmstrips	
1945-46	4,365	1945-46	1,762
1950-51	25,298	1950-51	8,327
1955-56	34,152	1955-56	15,847
1960-61	39,273	1960-61	15,650
1961-62	44,369	1961-62	15,566
1962-63	44,568	1962-63	17,518
1963-64	45,846	1963-64	16,402

4. Number of Projectors in Schools:

	Film Projectors	Filmstrip Projectors
November, 1960	795	740
November, 1961	800	800
November, 1962	911	1,149
November, 1963	920	1,200

5. Other statistics:

Number of sound films withdrawn	294
Number of sound films added (all sources)	144
Net loss	150
Number of filmstrips added	174
Number of filmstrips withdrawn	40
Net gain	134

(b) Other Information

1. School Visits:

Mr. Hamilton undertook a number of visits to schools in 1963, but because of staff vacancies, little field work was undertaken by the Branch during the first half of 1964.

2. The Film Advisory Committee:

Early in 1964 the former Screening Committee was replaced by the Film Advisory Committee consisting of Mr. Hamilton, Dr. Fritz and Joseph Haluschak of Jasper Place. The function of this committee is to preview films, to advise on film purchase and to periodically review the contents of the Film Library.

3. The CEA-NFB Committee:

Mr. Hamilton represented the Department at the CEA-NFB Advisory Committee in the fall of 1963.

2. School Broadcasts

(a) Broadcast Services

1. Radio:

During the 1963-64 school year the schools of Alberta had available to them 302 radio programs. One hundred and twenty-eight of these were produced at CKUA for release over a group of Alberta stations, 45 were produced at CBX, Edmonton, for release over CBC network stations in Alberta only, 82 were produced by the CBC for the Western Provinces, and 47 were produced by the CBC for release on their National Network to all provinces.

The following is a list of radio stations that carried programs to Alberta Schools:

Provincial Series			Network Series		
CKUA	Edmonton	11:00 a.m.	CBX	Alberta	2:00 p.m.
CKUA-FM	Edmonton	11:00 a.m.	CBXA	Edmonton	2:00 p.m.
CKXL	Calgary	3:00 p.m.	CFGP	Grande Prairie	2:00 p.m.
CHAT	Medicine Hat	2:00 p.m.	CKUA	Edmonton	2:00 p.m.
CHEC	Lethbridge	2:00 p.m.	CKUA-FM	Edmonton	2:00 p.m.
			CHAT	Medicine Hat	2:00 p.m.

The scope of radio broadcasts in Alberta by subject and grade were as follows:

	Division I	Division II	Jr. & Sr. High
Social Studies	4	48	27
Current Events	16	37
Music	41	46	4
Speech-Language	37
Science	10	27
Literature	22	25	14
Art	5	13
Vocations	4
	82	212	86

The utilization of the broadcasts was determined, in part, by the demand for publications which were issued by the Branch for use by teachers and students.

The following is a list of publications together with the number of copies distributed. All but the Calendar-Catalog which was distributed to all teachers early in September were sent out on request.

Calendar-Catalog	14,500
Teacher Guide to Division I	3,000*
Teacher Guide to Division II	2,700
Teacher Guide to Junior and Senior High	1,000
All Join in	40,000*
Speech Explorers	29,000
Question Mark Trail	27,000*
Let's Sing Together	35,400
It's Fun To Draw	2,750
Listen and Sing Word Book	46,000*

(The asterisk indicates that the supply did not meet the demand).

2. Television:

Through the facilities of the CBC and stations affiliated with the CBC National Network, Alberta schools had access to 132 television programs. Twenty-seven of these were planned by the Branch and produced in the studios of CBXT in Edmonton for distribution on the Alberta CBC television network, 28 were planned in co-operation with other Western Provinces, and 77 were produced by the CBC School Broadcasts Department on the advice of the National Advisory Council on which the Department is represented.

The following is a list of television stations that carried programs to Alberta schools:

CBXT	Edmonton	CHCT-TV-1	Drumheller
CBXAT	Grande Prairie	CJLH-TV	Lethbridge
CBXAT-1	Peace River	CJLH-TV-3	Burmis
CHAT-TV	Medicine Hat	CHCA-TV	Red Deer
CHAT-TV-1	Pivot	CHCA-TV-1	Coronation
CHCT-TV	Calgary	CHCA-TV-2	Banff

The scope of television broadcasts in Alberta by subject and grade was as follows:

	Division I	Division II	Jr. & Sr. High
Social Studies	6	25	49
Science	7	28	21
Drama-English	7
Literature	3	5
Art	4	4
Mathematics	4	4
French	4	4
	16	65	95

While the audience for school television was more limited than that for radio there was evidence that more than 500

classrooms took advantage of the various television series available to them during the 1963-64 school year. The largest audience was for series on Number Systems, Use of Maps, Recreational Reading and Natural Science.

(b) Tape Recording Service

1. Materials Available:

The Branch had a reservoir of 880 taped programs made up, for the most part, of broadcast material from provincial radio series of the past five years. It also included material prepared especially for the tape service, some programs from Britain and the United States and taped lessons to accompany high school French and German. Teachers sent tapes to the Branch and the programs which they requested were copied from master tapes to the school tapes and returned. A new Catalog was issued in 1963 listing materials under various subject headings. Most titles were listed under the heading of Social Studies, Literature and Science.

2. Utilization:

	1963-64	1962-63
Number of schools using service	149	82
Number of programs requested	3,246	1,137

3. Other Information:

(i) The Supervisor was kept informed concerning the local television projects in Oral French for elementary grades in both Calgary and Edmonton.

(ii) The Supervisor was made the Department of Education representative on the Edmonton Area Educational Television Committee which during the spring undertook a co-operative survey to provide information upon which future decisions concerning educational television in the Edmonton area can be based.

(iii) The Western Regional Committee on School Broadcasting met during the year in Winnipeg and Regina to plan both radio and television programs shared by the four Western Provinces.

(iv) The National Advisory Council on School Broadcasting met in Toronto in November, 1963 to consider national programming in both radio and television on the CBC networks. The Supervisor was appointed a member of a Programming Subcommittee to plan national programs for the following three years.

SPECIAL EDUCATIONAL SERVICES

(R. E. Rees, Director)

In addition to functions reported immediately hereunder, this Branch includes The School for the Deaf, The Correspondence School, Examinations, Guidance, Research, Special Education, The Students Assistance Board and the Education of Service Men's Children Act. Each of these activities is reported by the officer responsible.

Special Schools

The American School and the International Correspondence School continued to offer academic courses on a commercial basis under regulations of the Department of Education.

Also operating under regulations of the Department were Universal Tutoring College, Limited, with branches in Edmonton and Calgary, and two other firms authorized during the year to offer similar services, namely, Alberta Tutoring Service with branches in Calgary and Lethbridge, and Henderson Tutoring Service, Calgary.

Kindergartens

The number of privately-owned kindergartens authorized by the Minister to operate in the province was 136 at June 30, 1964, an increase of 82 during the year under review. All of these schools follow the curriculum developed by the Department and are visited annually by provincial Superintendents of Schools.

Summer Schools

The Department of Education has operated Grade XII Summer Schools for Teachers during the last five years on the Edmonton Campus, University of Alberta, in cooperation with the University of Alberta and the Alberta Teachers' Association. The number of teachers requiring this service has steadily decreased, as indicated by the following enrolment figures:

1959 — 542	1961 — 430	1963 — 283
1960 — 488	1962 — 378	

Local summer schools at the senior high school level were operated under regulations of the Department of Education by

Edmonton Public School Board—Grades X, XI, XII
Calgary Public School Board—Grades X, XI
Alberta College, Edmonton—Grades X, XI, XII
Mount Royal College, Calgary—Grades X, XI, XII
Lethbridge Junior College—Grade XII.

The Correspondence School Branch of this Department also provided summer school service for high school students.

Night Schools

Night school programs were provided for adults by school boards throughout the province, and by Alberta College, Edmonton. The grants structure for this service was unchanged. As formerly, Basic English courses were offered by local boards with joint grants from the Alberta and Canadian Governments, the latter also supplying texts and workbooks.

The following table indicates the programs offered by the various school boards that received grants.

	No. of Classes	Average Monthly Enrolment
Edmonton S.D. No. 7

Private Schools

Private schools may be established by an individual or a group upon receiving the approval of the Minister of Education in writing. Such schools must comply with the regulations of the Department, offer the provincial curriculum and be inspected annually by provincial Superintendents of Schools. At its annual meeting, problems related to the operation of private schools are discussed by the Committee on Private Schools and Colleges.

During the year two new private schools were authorized, namely Tempo School and John Knox School, both of Edmonton. Also, Lattornel School operated at a lumber camp in unorganized territory. At the end of June the Alberta Mennonite School, Coaldale, terminated its operation.

The following private schools offering regular instruction operated during the school year 1963-64.

PRIVATE SCHOOLS OFFERING INSTRUCTION IN ELEMENTARY AND JUNIOR HIGH SCHOOL GRADES

*Residential School.

ALBERTA SCHOOL FOR THE DEAF

(L. A. Broughton)

Educational:

Eighteen teachers provided instruction in regular school subjects. Three teachers again taught vocational subjects in Home Economics, Industrial Arts and Commercial Arts. A pre-grade IX program was the highest academic level taught during the year.

In September three students from the 1963 graduating class were registered at Gallaudet College, Washington, D.C., a college for deaf students. All three were successful in their studies and graduated to freshman level in June.

Education leave was given four teachers. Two attended summer schools, one at the Faculty of Education, Saskatoon, the second at Gallaudet College. Two enrolled for winter courses, one at San Francisco State College, the other at Gallaudet College.

In September a third deaf teacher was added to the staff. Only one resignation occurred in June, 1964 and the vacancy was filled by a teacher on educational leave. The position of Supervisory Teacher, vacant during 1963-64, was filled by the appointment in June of Miss J. V. Trott.

Parents' Visiting Day, March 6, was well attended. The visit provided first-hand observation for parents on teaching procedures, and of their child's progress.

Health Services:

Pupils continued to receive competent medical and dental health care. The doctor originally with the school since November, 1956, left private practice and was replaced by another general practitioner March 24, 1964.

Co-Curricular:

An informative and useful program in physical education, recreation and sports was shared in by all pupils. Inter-city league games in basketball and volleyball, were regular seasonal activities. Notable individual pupil results were achieved in swimming and in track and field events. Interest and progress in Girl Guides and in Boy Scouts continued at a satisfactory level. Leadership was provided by adults outside the school staff.

Statistics:

Beginners			13

CORRESPONDENCE SCHOOL BRANCH

(H. A. Flint, Director)

Enrolments

The total enrolment for the year was 12,853—an increase of 669 over that of 1962-63. Only the Elementary Section showed a slight decrease. Recent enrolment trends are indicated below.

ENROLMENTS FOR THE FOUR YEARS, 1960-1964

	1960-61	1961-62	1962-63	1963-64
Elementary (Gr. I-VI)	583	470	409	392
Jr. High (Gr. VII-IX)	1,546	1,337	1,407	1,422
Sr. High (Gr. X-XII)	9,049	9,617	10,368	11,039
TOTAL	11,178	11,424	12,184	12,853

Supervised Correspondence Centers

Number of classrooms with all pupils registered	3
Number of classrooms with small number of pupils registered to submit sample lessons	6
TOTAL	9

This total represents an increase of 4 over that of 1962-63.

Library Services

Circulation of leisure reading books for elementary grades	2,441
Circulation of leisure reading and reference books for junior and senior high school	5,256
TOTAL	7,697

Visiting Teacher

The services of the visiting teacher continued to be appreciated. During the year she made two tours of the province. The autumn tour (September 3 to November 5, 1963) covered all sections of the province except the Medicine Hat area; the spring tour (April 1 to June 27, 1964) covered the entire province.

SUMMARY OF ACTIVITIES

Number of homes visited	151
Number of pupils visited	197
Number of hospitals and rehabilitation centers visited	4
Number of medical cases at home visited	36
Number of supervised centers visited	8
Number of superintendents consulted	31
Total miles travelled	14,546

Staff

Clerical and Printing	36
Elementary	10
Junior High School	13
Senior High School (regular staff)	85
Senior High School (summer course staff)	11
TOTAL	155

Resignations	17
Transfers to other Government departments	1
Retirements	3
Staff as of June 30, 1964	141

Placement Tests

To determine the level at which adult students who had been out of school for several years should resume their education, 18 placement tests were written during the school year.

Staff Notes

During the school year the staff consisted of nine teachers and the section supervisor. This number includes the assistant supervisor, the visiting teacher, and a staff member who took leave of absence during the university term.

Several teachers participated in seminars conducted by the Specialist Councils of the Alberta Teachers' Association. These proved to be very worthwhile. One teacher attended university summer session.

During the year the teachers made a number of hospital and home visits to their pupils who live within the city limits.

JUNIOR HIGH SCHOOL SECTION (Grades VII-IX)

(Mary Dunnigan, Supervisor)

Staff Notes

During the year one new teacher joined the staff to replace one who was transferred to the Senior High School. Three teachers attended a seminar of one week's duration, for the purpose of bringing themselves more in line with the new concepts and teaching procedures in mathematics.

SENIOR HIGH SCHOOL SECTION (Grades X-XII)

(Berthold Figur, Assistant Director)

High school enrolments, in terms of students increased by 6.47%-, from 10,368 in 1962-63 to 11,039 in 1963-64. In terms of courses, the increase was 7.73%. A total of 14,373 courses was sent out to students at the high school level.

TOTALS	948	382	1,040	5,973	2,696	11,039

*Over 20 years of age.

Staff Notes

Eighty-five teachers, exclusive of summer staff, were employed in the high school section during the year. Impetus to staff changes resulted from thirteen resignations and three retirements.

Effort towards professional improvement continued at this Branch. Four teachers enrolled for university summer sessions, while three took advantage of the evening credit program. In addition, five took part in short term workshops and seminars.

Courses

Pressure to write and revise courses remained steady. Nine new courses were written and two were revised during the year.

1963 Summer Session

The summer school of the Correspondence School Branch was a success again in 1963. Enrolments of students rose by 230; enrolments by courses rose by the same number. Percentage of completions rose by 9.07% over 1962. Eleven additional teachers were employed for the special summer program. The following is a summary of enrolments and results:

Number of students registered	996
Number of courses for which students enrolled	1,111
Number of courses completed	846
Number of students completing one or two courses	745
Percentage of students completing one or two courses	74.79
Percentage of courses completed	76.15

EXAMINATIONS BRANCH

(S. T. Nichols, Supervisor)

To mark the 1964 Departmental Examination papers, a force of well over 700 sub-examiners, part-time clerks, and permanent staff members of the Examinations Branch were accommodated in temporary quarters at the Alberta School for the Deaf.

Although there was only a slight increase in the number of Grade IX candidates (122) over last year, there was a marked increase in the number of Grade XII candidates (1,128).

1. Dates on Which Result Statements Were Mailed:

	1963	1964
Grade XII examinations	July 26	July 27

GUIDANCE BRANCH

(J. D. Friesen, Supervisor)

In-service Work and Institutes

In-service work with superintendents, principals, teachers, and counsellors continues to be the major part of the work of this office. Factors such as technological and social changes, urbanization and increased educational requirements for employment, have created a rapidly developing interest in the guidance function. The Supervisor of Guidance spent 30 days attending and addressing institutes, conventions, university guidance classes, and zone meetings of superintendents.

The Eleventh Annual Conference of the Guidance Council was held in Calgary during the Easter Week with approximately 65 guidance personnel in attendance.

To acquaint guidance personnel and administrators with the selection procedures and training programs of the Armed Services, the Canadian Navy, the Canadian Army, and the Royal Canadian Air Force provided the opportunity for guidance personnel and administrators to visit Royal Roads and West Coast establishments and the Eastern selection units and manning depots of the Royal Canadian Air Force.

The Department of Public Health, Nursing Recruitment Branch, together with the Alberta Hospital Association arranged several institutes in Edmonton, Red Deer, and Calgary at which lectures were given to guidance personnel on entrance requirements to the health professions.

Committees and Subcommittees

The Supervisor of Guidance spent 50 days working with 15 committees and subcommittees. This included working with Curriculum Committees, Vocational Education Advisory Committees, Research Committee, Provincial Red Cross Committee, Alberta Specialist Guidance Council, Provincial Guidance Advisory Committee, Alcoholism Foundation, A.P.G.A. Membership Committee, Queen Elizabeth High School Selection Committee, and the Calgary Accreditation Team.

The Supervisor of Guidance organized Career Day committees for both northern and southern Alberta. A total of 62 career events were held in the province to which students and parents were invited. In addition, local career events were arranged in the cities of Edmonton and Calgary.

Information and Counselling Services

Requests for vocational information by mail were received from superintendents, teachers, students, parents, and adults and during the year amounted to over 500 inquiries. Requests for personal interviews were referred to either the University Counselling Centre, the University Education Clinic or other suitable

agencies. Shortage of time did not permit the Supervisor of Guidance to provide personal counselling or a testing service.

Publications

Pamphlets and other materials were distributed to high schools in the bi-monthly mailing. The following include some of the publications which were either prepared or revised during the year:

The biennial revision of "Occupational Trends and Employment Opportunities", the yearly edition of the booklet, "Financial Assistance to Alberta Students", a pamphlet, "Evaluative Criteria for Guidance Services", "A Statement of Policy for Guidance" (in preparation) and other items for inclusion in the "Counsellors' Basic Kit". A "Health and Smoking Kit" prepared by the Department of Health was also sent to all the school principals of the province.

RESEARCH OFFICE

(V. R. Nyberg, Co-ordinator)

1. Departmental Examinations

(a) Grade IX Departmental Examination scores for 1963 were scaled as were the Grade XII scores for examinations held in June, August and December of 1963 and January and March of 1964. Experimental courses conducted in Grade XII biology and physics necessitated the construction of two scales not ordinarily required.

(b) Scales for English 30 and Social Studies 30 were adjusted to allow for the removal from each group of some low achievers in a few school systems. These low achievers were placed in special courses for which there were no final examinations. The adjustment was effected by predicting English 30 and Social Studies 30 marks for the low achievers on the basis of Grade IX achievement and including these marks in the population to be scaled.

(c) The correlation between Part A and Part B of the English 30 examination was computed.

(d) A study was made to determine whether Grade IX achievement could be determined in terms of fewer measures than are now used. The study was in the form of a factor analysis based on nine measures which resulted in the identification of four factors.

2. Special Projects

(a) A study of Alberta school pupils who transferred during the period from July 1, 1962 to June 30, 1963, was completed. A summary of the study is contained in a mimeographed pamphlet entitled **Pupil Mobility**, prepared and distributed in the fall of 1963.

(b) The Quality Control studies begun in 1962 were continued. A report of the tests in Grade XII Mathematics and English administered in May, 1963 was compiled and distributed. In May, 1964, a test in Grade XII Chemistry was administered.

(c) A study of achievement in science at the Grade VI level was completed in September, 1963. Comparisons were made on the basis of testing done in the spring of 1958 and of 1963. A report entitled **Report on Quality Control Studies, Grade VI Science** was issued.

(d) Data have been gathered with respect to students in Grades IX, X, XI and XII who dropped out of school subsequent to registration in September, 1963. Some of the factors associated with the dropping out of students will be studied.

(e) A study of drop-outs from the 1962-63 Freshman class at the University of Alberta was initiated.

Miscellaneous

(a) A study was conducted at the request of the Curriculum Branch on Grade X Developmental Reading. The study involved testing a group of students twice over a seven-month interval.

(b) Approximately 36,000 test answer sheets were machine-scored for various school systems.

(c) A breakdown of students entering the University of Alberta by faculty and by place of high school instruction was begun.

(d) A pamphlet entitled **Alberta Testing and Research Bulletin, Applying Grade IX Results** was printed and distributed. This pamphlet summarizes two follow-up studies of Grade IX students conducted by the research office.

SPECIAL EDUCATION

(D. W. Hepburn, Supervisor)

Special class facilities for handicapped children, which have been increasing steadily in recent years, continued to increase during 1963-64. The largest number of such classes are the "opportunity classes" for educable mentally handicapped children. These were provided in 30 school districts or divisions. The Edmonton and Calgary public school districts also provided special class facilities for visually-impaired, hard-of-hearing, emotionally disturbed, neurologically impaired, and physically disabled children. These facilities were, in many instances, made available to children from other school districts, suitable boarding arrangements, where necessary, being made by the parents. Of particular interest was the opening of the crippled children's unit at the Glenrose Provincial Hospital in Edmonton. Although the new children's unit is still in the planning stages, ward and classroom facilities for up to forty-four children were made available in the main wing of the Glenrose Hospital. Admissions began in January, and soon the enrolment reached 35. Teaching services were provided by the Edmonton Public School Board.

The Department of Education provided an advisory service to school districts and divisions offering special-class facilities and assistance in setting up new classes, as well as financial assistance through special grants under Section Two of the Grants Regulations. The following table summarizes the special classes for which Departmental grants were paid.

School Board	Number and Types of Classes	Enrolment
Bonnyville S.Div. No. 46	1 opportunity class	15
Bowness S.D. No. 4590	2 opportunity classes	29

Education of Blind Children

Because the number of blind children in Alberta is relatively small, there is no school for the blind in the province. Those legally blind children who can read print may attend sighted schools in either regular classes or special low-vision classes. The Department of Education provides large-print books on a loan basis where necessary. Children who must be instructed in braille attend a residential school for the blind in either Ontario or British Columbia. The Government meets all costs of tuition, board, transportation and escort services, including the costs of returning the children to their homes for the Christmas recess. The following table gives the number of children attending schools for the blind, during 1963-64.

PUPILS ATTENDING SCHOOLS FOR THE BLIND, 1963-64	
Ontario School for the Blind, Brantford	7
Jericho Hill School for the Blind, Vancouver	16
TOTAL	23

Pre-School Classes for Hearing-Handicapped Children

During the year pre-school classes for children with serious hearing losses and attendant speech problems were operated in Edmonton and Calgary by the Association for Hearing Handicapped Children. There were seventeen children enrolled in each city, in a half-day program designed to teach them to use a hearing aid, to develop speech and language and to prepare them for entry into a regular class, a hard-of-hearing class, or the School for the Deaf. The Department of Education provided financial assistance toward the costs of operation.

Schools for Retarded Children

Schools for retarded children were operated in eleven centres in 1963-64, and in addition several Alberta children attended school in Lloydminster. These day schools, which provide appropriate instruction for severely or "trainable" retarded children, are operated by various local chapters of the Association for Retarded Children. They receive substantial financial assistance from local school boards and from the Department of Education, both for operating expenses and for capital costs. During the year a new school building was erected for the Parkland School for Retarded Children in Red Deer, bringing to eight the number of school buildings built with provincial government aid. In addition, construction began on a second school in Calgary, and plans were initiated for a school building in Camrose. The Department also provided an advisory service to the schools and assisted in the development of useful instructional programs.

The following table shows the enrolments in the schools for retarded children.

SCHOOLS FOR RETARDED CHILDREN

Location	Number of Teachers	Number of Pupils Ages 6 to 20
Calgary (Christine Meikle School)	24	161
Camrose	2	9

THE STUDENTS ASSISTANCE BOARD

(C. G. Merkley, Chairman)

Under the authority of The Students Assistance Act, 1959, the Students Assistance Board was established to administer moneys appropriated by the Legislature for the Queen Elizabeth Education Scholarship Fund and the Students Loan Fund. The regulations pursuant to the Act make provision for the awarding of assistance to high school students, university matriculants, university undergraduates and graduates, students at the Provincial Institutes of Technology and the Alberta Agricultural and Vocational Colleges, nurses-in-training, and persons attending the Banff School of Fine Arts.

Awards in the form of loans, prizes, bursaries, grants, scholarships, and fellowships are available to residents of Alberta. In general, one of the conditions of eligibility requires applicant students to pursue programs of further education in approved institutions in Alberta, although assistance may be granted to undergraduate students for college or university courses not offered at the University of Alberta. More complete details respecting the kinds and amounts of the awards and the conditions of eligibility are given in the brochure prepared by the Students Assistance Board.

Administration

During 1963-64, the Students Assistance Board was comprised of the following members:

Mr. C. G. Merkley, Department of Education, Chairman.
 Mr. J. Mitchell, Department of Education, Member.
 Mr. W. Pilkington, University of Alberta, Member.
 Mr. R. B. Wishart, University of Alberta, Member.
 Mr. C. W. Kellner, Department of Education, Secretary.

Expenditures

During the period of April 1, 1963, to March 31, 1964, the total number of students receiving assistance from the province was 7,769. For the same period the total value of the awards was \$1,940,857.03. The comparable figure for the year immediately previous was \$1,626,140.74.

The following table gives an analysis for the past fiscal year of the expenditures for the various types and numbers of awards and the numbers of students receiving benefits from the Queen Elizabeth Education Scholarship Fund and the Students Loan Fund.

THE STUDENTS ASSISTANCE ACT

(THE QUEEN ELIZABETH EDUCATION SCHOLARSHIP FUND)

Details of expenditure made during the fiscal year 1963-64:

Awards to Students	Number of Awards	Amount
Matriculation Scholarships	300	\$ 64,095.75
Undergraduate Scholarships	300	71,900.00
Matriculation Grants	851	161,722.43

Loans to Graduate Students	33	13,040.00
Loans to Vocational Students	416	193,730.00
Loans to Agricultural Students	23	5,950.00
TOTAL Loans	2,976	\$ 1,023,915.00
GRAND TOTAL, Awards and Loans, 1963-64	7,769	\$ 1,940,857.03

Publicity

The office of the Students Assistance Board prepared and distributed more than 40,000 pieces of explanatory literature to teachers, school officials, high school students and community agencies. Included in the distribution were regulations, a descriptive brochure in color, and various leaflets. The University of Alberta gave prominence to the Queen Elizabeth Education Scholarship Fund in calendars and related publications.

Reports concerning awards to scholarship recipients were released periodically to the press. Talks on student aid were given by the Chairman to high school and university students, school principals, and a number of other agencies and organizations.

Changes in Regulations

During the year university students entering the first and second year in the Faculty of Education were provided with grant and loan assistance rather than tuition grants. The maximum amount of loan was raised from \$400 to \$500 for all faculties except medicine and dentistry where the maximum was raised to \$700.

Grants and loans were made available to students attending vocation courses of the Lethbridge Junior College.

The opening of the Northern Alberta Institute of Technology has expanded the number of applicants for grant and loan and additional office staff and space have been necessary to cope with the increased volume. The maximum loan for a student attending a technical institute increased from \$750 to \$900.

For students at agricultural colleges, loans increased from \$300 per year to \$200 per quarter or a maximum of \$600. In order to equalize opportunities in the three agricultural colleges, the number of prizes rose from 16 to 21. To assist the student nurses the grants were raised from \$100 to \$150 and loans up to \$100 were provided in addition to the grants.

THE EDUCATION OF SERVICE MEN'S CHILDREN ACT

(C. W. Kellner, Secretary)

The Education of Service Men's Children Act provides financial assistance to students who are the children of deceased or disabled servicemen who served in the armed forces during World War I and World War II. The Act is administered by a Board established by the Minister of Education.

During the school year 1963-64 an average of 361 students from 284 families received monthly allowances under this Act. The number of students receiving assistance varied from 315 during September, 1963 to 384 during June, 1964. Expenditure for the fiscal year 1963-64 amounted to \$49,000.04.

Following is a summary of the students receiving assistance as at June 30, 1964:

Grade IX	98 students
Grade X	106 students
Grade XI	99 students
Grade XII	81 students

Financial assistance is provided for students enrolled at Alberta schools in Grades IX to XII inclusive. Assistance may also be made available to students enrolled at a Provincial Institute of Technology or a Provincial Agricultural and Vocational College. Allowances are paid during each school month to a student or to his parent.

REPORT OF THE SCHOOL BOOK BRANCH

(W. F. Logan, Manager)

The School Book Branch is charged with the responsibility of making available all titles recommended for Grades I to XII, by the Department of Education, for students, teachers and school boards within the Province of Alberta. Its main objective is to purchase and distribute these school books promptly, efficiently and at the lowest possible prices. In addition, the School Book Branch has the responsibility of supplying textbooks and supplies to students enrolled at the Northern and Southern Alberta Institutes of Technology.

The Branch offers the following services to the educational systems of Alberta:

1. Forming a centralized depot or repository for school books and ensuring that titles are available when required.
2. Standardizing school book prices throughout the province so that purchasing conditions are equitable and no discrimination is suffered by students and schools in remote areas.
3. Purchasing books in large quantities and thus securing the lowest transportation rates and publishers' minimum prices.
4. Securing special library and reference books which are not regularly stocked by the School Book Branch.
5. Selling books at cost. The School Book Branch is not required to produce revenue for the Government and, therefore, operates on a non-profit basis. However, the Branch may be described as self-sustaining since it pays for all the charges entering into the costs of operation from a small mark-up on text books.

Financial Report

The School Book Branch has completed its 50th year of public service as wholesale distributor of school books in the Province of Alberta. The most conspicuous aspect of the operation of this Branch during the past two decades has been its rapid and continuous growth.

The following significant statistics were selected from the Provincial Auditor's report for the twelve-month period between April 1, 1963 and March 31, 1964:

- (a) Total sales for the fiscal year amount to \$2,641,858.58 an increase of \$91,298.78 or 3.6% over the previous year. This is the greatest volume of sales in the history of the School Book Branch.
- (b) Purchases by the School Book Branch from the publishers and suppliers for the fiscal year were \$2,329,284.20. The majority of this stock (approximately 830 tons) was transported from Eastern Canada by truck. Shipments weighing less than 30 lbs. were brought in by railway express and smaller parcels were shipped by mail.
- (c) The physical inventory of books at March 31, 1964, was valued at \$650,869.94 which is a little more than 24.6% of total sales. The inventory figure is \$111,150.79 more than last year's inventory value.

- (d) Net profit for the year was \$119,413.53. This is approximately 4.5% of total sales. However, the sales figure includes an amount of \$286,926.15 received from the Provincial Treasury to cover the additional discount allowed to school systems under the Textbook Rental Plan in accordance with Order-in-Council No. 935/57. Thus, although the financial statement indicated a small profit, the operation of the School Book Branch was in fact subsidized to the extent of \$167,512.62.
- (e) The total operating expenses amounted to \$306,011.05 which is about 11.6% of total sales or approximately 13.8% based on invoice cost of goods sold.
- (f) The School Book Branch had 90 dealers serving the school population. These dealers sold books to the value of \$268,902.99 during the fiscal year.

Library Books

The curriculum subcommittees on Free Reading recommended the following revisions in our library catalogues:

- (a) Enterprise Activities for Elementary Schools

In addition to the 300 Enterprise titles regularly stocked by the School Book Branch, this catalogue now includes a Special Order Section which contains a list of teachers' references and enrichment books. There were 58 new titles added to the "stock" section and 76 new titles were added to the Special Order Section. There were 27 titles deleted from this catalogue. The Special Order Section lists 141 titles.

- (b) Reading for Pleasure—Elementary

146 titles were added (4 in the primary section and 142 in the secondary section); 16 titles were deleted (6 in the primary section and 10 in the secondary section). This catalogue now lists 530 titles in the primary (stock) section and 585 titles in the secondary (special order) section.

- (c) Invitation to Read for Junior and Senior High Schools

This catalogue now lists all the library books which previously appeared in both the Junior and Senior High schools free reading catalogues. There are 757 titles in this catalogue which are regularly stocked by the School Book Branch. A total of 43 new titles were added this year and 45 titles were deleted.

Textbook Rental Plan

The Textbook Rental Plan was first introduced on an experimental basis in 1952 with only a few school boards participating. In 1957 the Provincial Government approved the extension of the plan to all school boards in the province. To become eligible, the school board must either supply the books to students free or at a rental fee that does not exceed one-third of the cost of the books to the board. A special discount of 40% off the retail price is offered on the textbooks which are used in the rental scheme.

The administration of the Rental Plan is done at the school board level. The plan appears to have been well received by all participating school systems and, at the present time, most of Alberta's school population receives benefits under the plan. A detailed report on the operation of the Alberta Textbook Rental Plan can be found in earlier annual reports of the Department of Education.

The majority of Alberta's school systems now operate a Textbook Rental Plan. Four school boards made application to participate in the rental plan beginning with the 1963-64 school term. The amount of Government subsidy to administer the Rental Plan during the 1963-64 fiscal year was \$286,926.15. Rental Plan sales were \$975,548.91 which is approximately 36.9% of total School Book Branch sales.

Southern Alberta Institute of Technology Book Store

The School Book Branch is responsible for the administration and operation of the Book Store at the Southern Alberta Institute of Technology in Calgary. The purpose of this store is to obtain textbooks and supplies used by students attending the Institute.

The net sales for the 1963-64 fiscal year were \$102,974.10. The value of inventory on hand at the end of March 31, 1963 was \$37,002.52; of this amount \$21,334.96 was in books and \$15,667.56 was in supplies. Operating expenses totalled \$16,897.61 which was approximately 16.4% of total sales. During the year about 244 different titles of books and 486 different items of supplies were handled.

Northern Alberta Institute of Technology Book Store

The Book Store at N.A.I.T. completed its first full year of operation. During the year approximately 225 different titles of books and 101 different items of supplies were handled.

Sales for the fiscal year ending March 31, 1964 were \$66,851.20. The value of inventory on hand was \$24,662.81; of this amount \$20,351.79 was in books and \$4,311.02 was in supplies. Operating expenses totalled \$11,689.64 which was approximately 17.5% of total sales.

Free School Text Branch

The School Book Branch supervises the distribution of readers for the Free School Text Branch. Readers were supplied free of charge to all school systems in Alberta on a per capita basis of \$1.30 for each student enrolled in Grades I to VI inclusive. The net value of readers distributed was \$263,025.10. Of this amount the initial distribution was \$242,170.50 and the additional allotment for school systems which experienced an increase in enrolment in September, 1963, amounted to \$20,854.60. Freight and cartage expenses for bringing the readers in from the publishers were \$5,039.76 and the transportation charges for shipping the readers to the schools were \$1,468.23. Total transportation expenses were \$6,507.99. Expenses for supplies and printing costs were \$470.15.

REPORT OF THE DIVISION OF VOCATIONAL EDUCATION

(J. P. Mitchell, Director)

This report covers the 1963-64 fiscal year. The staff of the Division was increased by the addition of Mr. E. Baker, Coordinator of Small Business Management Training Programs, in May, 1963.

The activities in connection with the provision of buildings and equipment for technical and vocational education, as eligible under the Federal-Provincial Technical and Vocational Training Agreement, continued at a high level.

The total estimated cost of all projects approved as of March 31, 1964 for financing under the terms of the Technical and Vocational Training Agreement was \$52,163,759. This was an increase of \$2,348,701 during the year. Provincially operated Colleges of Agriculture and Institutes of Technology, and municipally operated Secondary Schools, including the Lethbridge Junior College, were involved.

The Northern Alberta Institute of Technology enrolled students in all Divisions (Apprenticeship, Technology, Business Education, Vocational, and Evening) for the first time during the year and, as indicated in the report of the Principal, the enrolments augur well for the future. Indeed, there are now indications that increased accommodation for both the technician training and the apprenticeship training program will be required in Alberta in the near future.

The Vocational Teacher Education program, as offered by the Department of Industrial and Vocational Education of the University of Alberta, Edmonton, which operates with financial support as provided under Schedule 7 of the Technical and Vocational Training Agreement, is proving effective in providing instructors for the Vocational High Schools. The second beginning class of 61 (12 female, 49 male) enrolled during the year. Indicative of the "occupational competence" of these potential instructors is that they have an average age in excess of 40 years, and have had an average of 12 years' experience in industry or business. In addition, a Vocational Guidance Counsellors' one-year degree program was inaugurated during the year, as part of the offering of this Department of the University. There were 15 students enrolled in this program.

At the High School level, both buildings and equipment were approved as projects for the following centres: Vulcan; McNally, Edmonton; Henry Wise Wood, Calgary; and Peace River. There were, in addition, many approvals in connection with the provision of equipment for all projects under way.

Programs 3, 4, 5 and 6 of the Agreement are designed primarily to provide training that will improve the potential of the Province's manpower. A variety of courses are made available under the terms of these programs, including Rural Welding courses for farmers, of which 29 classes were offered in 26 centres

in the Province. The Rural Welding classes are established in cooperation with the Department of Agriculture, the local District Agriculturalist and with the assistance of the major power companies.

A Dairy Short Course is made available to young men who wish to establish themselves in the dairy processing industry, and a course on the care, operation and maintenance of farm equipment is offered in selected rural communities to assist farmers to obtain the maximum benefit and service from their machinery investment.

The school for training officers of Fire Fighting units of Alberta communities was continued during this year, with two phases of the training being conducted at Vermilion and the third phase being conducted at Calgary. A total of 130 men participated in the schools.

As activity in the Province's oil industry continues to expand, more pipelines are built to move products from point to point. To provide competent welders in new welding techniques for work on these pipelines, the Division established and conducted a school in the use of semi-automatic gas shield welding equipment. The school essentially provided the opportunity for welders to keep abreast of technological changes in the pipeline welding industry. A second school of pipeline welding was established which trained young men for entrance to the industry by providing them with basic training on big-inch pipe up to 36" in diameter. Trainees came to the Edmonton school from points throughout the Province.

Many other kinds of training were made available to persons preparing for entry to the labor market. To take advantage of these courses, there were unemployed persons who were re-training for new jobs, physically disabled persons, and workers who found it necessary to upgrade their qualifications because of changes in practices, procedures or methods.

Training classes were offered in welding, small equipment operation, drafting, barbering, beauty culture, nursing aide, commercial, waiter, waitress, stenography, agriculture, watch repair, appliance repair, shoe repair, as well as an expanded establishment of Vocational Preparatory classes. The Vocational Preparatory classes offer study in mathematics, science, and English, and permit the individual to improve his understanding and competence in these basic academic subjects in preparation for further training in trade and technical subjects. Vocational Preparatory classes were established in Edmonton, Calgary, Drumheller, Lethbridge and Medicine Hat, with over 442 trainees enrolled.

Training to meet the specific needs of physically disabled persons to enable them to develop themselves, and subsequently to make a contribution to the economy of the Province continued as an activity in the Division. Several deaf persons were enrolled in Gallaudet College for the Deaf, Washington, D.C., and began university studies that will prepare them in the fields of science,

physical education and arts. Training for blind persons was arranged in such occupations as welfare field work, stenography, and broom-making.

Under Schedule 4 a program of training specially designed to meet the needs of businessmen who are owners and operators of small businesses was introduced in the fall of 1963. By March 31, 1964, 152 persons had participated. The program offered courses in Management Accounting, Retailing, Bookkeeping, Marketing for Manufacturers, Marketing for Service Businesses, and will soon add courses in Small Plant Management, Staffing, Business Law and Exporting. Courses were established in communities throughout the Province in cooperation with local Chambers of Commerce or service groups, or other similar bodies. The centres of Medicine Hat, Calgary, Taber, Stettler, Wainwright, Jasper Park, Edmonton, and Westlock all conducted one or more classes and look forward to more activity in this field in the coming year.

The Supervisory Training and Management Development programs made available by the Division to industries and community organizations were provided to 11 new communities in the year and continued to be active in many individual companies. In all, 1,468 supervisory and management personnel participated in training sessions.

Statistics

Details relative to Program 1 (Vocational High School Training Program) and 2 (Technician Training Program) are available in the reports of the Division of Instruction and of the Technical Institutes respectively.

NORTHERN ALBERTA INSTITUTE OF TECHNOLOGY

(W. A. B. Saunders, Principal)

Courses

During the past year the Northern Alberta Institute of Technology, Apprenticeship Division, offered courses to 2,506 students in 19 trades, and 4 pre-employment courses in the fields of construction, heavy duty mechanics, welding, radio and TV repair, to 46 students. The Technology Division offered the first year of 17 post secondary technical courses and the Business and Vocational Division offered 13 courses including 6 courses for the Canadian Vocational Training program. Initially it had not been anticipated that it would be practical or necessary to offer evening courses during the first year of operation. It became apparent, however, that certain specialized courses should be given. Subsequently, an evening division was formed under the direction of Mr. J. O. Starritt which offered 20 courses.

Staff

Generally, staffing was accomplished satisfactorily; however, difficulty was experienced in obtaining the services of suitable people in some specialized areas, such as medical laboratory technology.

Enrolments

In reporting registration for all divisions it is interesting to note that there were approximately 400 applications in excess of the maximum number of students planned for and that approximately 300 of these had the necessary prerequisites to enter the courses desired. It is also significant to note that the pre-registration for the coming year forecasts a similar situation. It would therefore appear that the 1963 registrations were not influenced by a backlog of students waiting for the completion of the Institute. It should also be noted that classrooms and laboratories had to be reserved for second year students. This accounts for the registrations being somewhat lower than the total the Institute facility will accommodate.

Scholarships

During the year \$5,825 in unsolicited prizes and scholarships have been donated by the following:

30 Queen Elizabeth Prizes

10 Canadian Manufacturers' Association Scholarships

British American Oil Company Ltd.

Dominion Glass Company Ltd.

McCoy Bros. Ltd.

McKinley & Taylor Ltd.

Molson's Edmonton Brewery Ltd.

Metal Fabricators & Roofing Ltd.

North Western Pulp and Power Ltd.

Western Chemicals Limited

- 1 Sunwapta Broadcasting Scholarship
- 2 Shell Canada Limited Scholarships
- 1 California Standard Scholarship
- 1 Canadian Utilities Scholarship
- 1 Canadian Industries Limited Scholarship
- 1 Chemcell (1963) Limited Scholarship
- 1 Dominion Bridge Scholarship
- 1 Van Waters & Roger Scholarship
- 2 The Charles Margolna Scholarships
- 3 Alberta Government Travel Bureau Scholarships
- 10 Alberta Hotel Association Scholarships

Through the efforts of the Canadian Manufacturers' Association the Institute received 10 scholarships from the companies listed above.

Open House

In excess of 22,000 people attended the first Open House on the evenings of March 11, 12, and during the day of the 13th. Over 2,000 High School students from outside of Edmonton were able to attend on the 13th. This interest by the public is very gratifying.

SOUTHERN ALBERTA INSTITUTE OF TECHNOLOGY, CALGARY

(F. C. Jorgenson, Principal)

1. History and Location

Formed in 1916 as the Provincial Institute of Technology and Art, the Institute has grown steadily over its 48-year history. In 1961, because of the decision to establish a similar institute at Edmonton, the present name was adopted and the Art Department became known as the Alberta College of Art, a division of the Institute.

The Institute is a landmark in the City of Calgary, made up of nine buildings on a campus of approximately 65 acres in the northwest area of the City.

2. Purpose

The Institute offers post-high-school courses as follows:

- (i) Day Courses:
 - A—Technical Institute Division
 - B—Cultural Division
 - C—Trade Training Division
 - D—Industrial Arts Program for Teachers
- (ii) Evening Courses
- (iii) Correspondence Courses

3. Enrolment

The enrolment in day, evening and correspondence courses for the past five years is given in Table II.

The total student hours of attendance for day students for the past three years are shown in Table III.

4. Day Courses

Complete details on course registrations are in Table V. Compared with the previous year, the enrolment for all day courses decreased by 2%, due in part to the opening of the Northern Institute in Edmonton. The numbers of students coming from different geographic areas were as follows:

- 445 from the cities of Alberta
- 499 from the rural areas of Alberta
- 290 from outside the province.

The course in Diesel Mechanics was extended from five months to eight months, providing additional time for practical training.

5. Apprenticeship Training

The number of apprentices who reported for training in the various trades is given in Table V.

6. Evening Courses

Enrolment in Evening Courses increased by 24% from the previous year. The average attendance was 83%.

Reference should be made to Table IV for detailed statistics.

As in former years students were registered not only from Calgary and Bowness, but from the following Southern Alberta points:

Acme, Airdrie, Balzac, Banff, Black Diamond, Canmore, Carstairs, Castor, Cluny, Cochrane, Crossfield, DeWinton, Didsbury, Exshaw, Fort Macleod, High River, Innisfail, Lacombe, Linden, Okotoks, Olds, Parkland, Red Deer, Rockyford, Royalties, Strathmore, Taber, Trochu, and Turner Valley.

7. Correspondence Courses

Enrolment in Steam Engineering courses and Practical Mathematics decreased by 2% from the previous year. Detailed statistics are given below.

8. Staff

Mr. W. Partin, Head of the Electronics Department since 1947, accepted a position with the Federal Department of Labour, Ottawa. His contribution to the development and progress of the Institute is gratefully acknowledged. Mr. K. M. Watt succeeded Mr. Partin.

A staff of 265 persons, including part-time instructional and clerical staff, was engaged in conducting the Day and Correspondence Courses. In addition, a part-time staff of 119 persons was employed for the Evening Course Program.

Under the terms of the Technical and Vocational Training Assistance Act, the Government of Canada re-imbursed the Institute \$582,998 for training programs.

During the year under review, several members of the instructional staff successfully completed University of Alberta courses which were offered during the summer session and late afternoon and evening programs.

In the early summer of 1964, six instructors attended a summer teacher training course in Winnipeg. Another instructor attended a summer course at the University of California. The Institute's Teacher Training Program was held in September, 1963, for new and junior instructors.

9. Student Activities

The Annual Report of the Co-ordinator of Student Activities shows that a total of 4,229 students participated in the various phases of the extra-curricular program—an average of more than three activities per student.

The activities included: athletics, departmental clubs, religious groups, music and drama, publications, special events, association clubs, student government, special committees.

Athletic activities included intercollegiate, extra-mural and recreational levels, with active participation in all of the following: archery, badminton, basketball (men), bowling, boxing, cheer-leading, curling, fastball, gymnastics, hockey, karate, rifle and pistol, skiing, table tennis, and volleyball.

The new Constitution and By-Laws were completed and adopted during the term.

The Student's Association became a member of the Canadian Union of Students, the Canadian University Press, and the Western Inter-College Conference during the year.

The Executive Committee achieved its objectives and the various Standing Committees carried out their functions in a creditable manner.

Association publications were of a high standard. Included in the plans for 1964-65 is a Students' Handbook.

The highlights of the student activities other than athletic were Frosh Week, the Banff Trip, the Christmas toy campaign, the Blood Donor Clinic, the Annual Banquet and Dance, the Graduation Banquet and Dance, and the Queen Campaign.

The Student Activities Building has provided its first year of service, and was indeed an asset to the campus.

10. Publicity

The Public Relations Officer, Mr. M. W. Cunningham, prepared and distributed press releases to various publications in Alberta and outside the province. Although all major functions at the Institute were publicized this year, the amount of coverage was less than a year ago. Excellent publicity, however, was given free of charge by local radio and television stations as well as local newspapers for many Institute activities.

Institute representatives spoke at career events in various centres in the southern part of the province. Bulletins and posters publicizing Institute courses were mailed at regular intervals to all Alberta and British Columbia High Schools.

Approximately 13,500 persons visited the Institute during the Annual Open House held from March 11 through 13. About 850 high school students from outside Calgary were among the visitors. Sixty student counsellors of the Calgary Public and Separate High Schools visited the Institute on March 4 to become better acquainted with Institute courses.

11. General

The Students Assistance Act again provided loans and grants for needy students.

New scholarships, non-monetary awards, and bursaries totaling \$2,450 were donated as follows:

Alberta Reprographics and Supply Limited

Canadian Manufacturers' Association Members:

British American Oil Company Limited

Dominion Glass Company Limited

Lennox Industries (Canada) Limited

Northwestern Pulp and Power Limited

Sheritt Gordon Mines Limited

Sicks' Lethbridge Brewery Limited

Summit Lime Works Limited

Canadian Pacific Air Lines Limited
Chemical Advisory Committee
Cities Service Athabasca, Incorporated
E. W. Wood Memorial
Institute of Power Engineers
Instituto Allende
International Nickel Company of Canada Limited
Northwest Industries Limited
Oilfield and Technical Society, Calgary Branch
Shell Canada Limited
Standard Aero Engine Limited
The California Standard Company
T. W. Porter

Advisory Committees for the following courses met at least once during the year and provided valuable service which the Institute gratefully acknowledges:

Aeronautical Engineering Technology and Aircraft Maintenance Technology
Architectural Technology
Commercial Cooking
Construction Technology
Drafting Technology
Industrial Electrical Technology
Industrial Laboratory Technology
Mechanical Technology
Merchandising Administration
Petroleum Technology
Power Plant Engineering Technology
Refrigeration and Air Conditioning Technology

REPORT OF THE DIVISION OF SCHOOL ADMINISTRATION

(E. D. Hodgson, Director)

This report covers the year ended June 30, 1964, with the exception of financial tabulations, which cover the calendar year 1963.

Personnel

Officers of the Division at June 30, 1964, were as follows: (Dr. E. D. Hodgson assumed the Directorship on April 13, 1964)

Director	E. D. Hodgson
Assistant Director	A. B. Wetter
Administrative Officer	U. R. Shogren
Administrative Officer	R. B. Budge
Administrative Officer	R. Penrice
Accountant	G. R. Harper
Supervisor of School Buildings	C. G. Jewers
Tech. Asst. Sup. of School Buildings	L. S. Grant
Buildings Inspectors	W. M. Everts, A. F. Walker

Changes in School District Organization

New School Districts

During the 1963-64 school year fourteen new public school districts were established, about the same number as in the previous school year. All of these were to provide organized school services in newly settled or fringe areas of the Province. Eight Roman Catholic separate school districts were established; of these two were in large town districts, and the rest in rural districts.

Inclusions, Transfers, Dissolutions and Counties

Twelve of the newly established public school districts were immediately included in school divisions, one was dissolved before commencing operation because oil development ceased, the other remains independent.

Four districts were dissolved. One was dissolved for reasons already mentioned, one served a lumber mill which ceased operation, a large town district was annexed to a city, and a separate school district reunited with a public school district.

Turner Valley School District No. 4039 was included by agreement in the Foothills School Division No. 38. Two rural school districts, which had operated independently for some time, were included in divisions to take advantage of centralized school facilities.

Thirteen rural school districts were transferred from one division to another as follows:

One from Westlock School Division No. 37 to Northland School Division No. 61.

Eight from Fort Vermilion School Division No. 52 to Northland School Division No. 61.

Three from Berry Creek School Division No. 1 to Acadia School Division No. 8.

One from Northland School Division No. 61 to East Smoky School Division No. 54.

Three counties were incorporated, effective January 1, 1964: Vermilion River No. 24, Leduc No. 25, and Lethbridge No. 26. No additional "urban county" was formed and the number remains at one (Devon) since the act was passed.

Short Course in School Administration (Banff)

Mr. A. B. Wetter participated in the planning of the Annual Short Course in School Administration, and the Hon. Mr. A. O. Aalborg, Dr. E. D. Hodgson, Mr. A. B. Wetter, Mr. U. R. Shogren, and Mr. R. Penrice attended the sessions at Banff in June of 1964.

The attendance at the short course exceeded that of the previous year. The theme was "Managing the School Real Estate". The value of the course, judging from the growth and interest shown, improves with each succeeding course. Trustees and secretaries have some separate program items, but continue to share a number of joint sessions.

In addition to attending the short course, many secretaries supplement their training by enrolling in courses prepared by the Department of Extension, University of Alberta. The Department is sponsor of both the correspondence courses and the short course with officers of the Department of Education acting on the committees. The correspondence courses offered for school personnel were: Local Government Organization, Local Government Functions, Local Government Accounting, Local Government Business Affairs, and Municipalities Planning.

Alberta School Trustees' Association Convention

The School Trustees' Association, at its annual convention, makes a Department of Education room available to officials of the Division of School Administration. Various school boards and school officials seek interviews in the room provided. The great number of interviews conducted is evidence that the Department of Education thus renders a valuable service, particularly for those people who would otherwise have to travel great distances at another time to the Department of Education itself.

Special Duties

Dr. J. W. Chalmers continued to act as Official Trustee of the Northland School Division until he left Departmental employ

early in 1964. Mr. R. B. Budge, Field Administrative Officer, assumed the duties of Official Trustee.

Dr. E. D. Hodgson, succeeding Dr. Chalmers, represented the Department of Education on the Provincial Planning Board, and became Chairman of the School Buildings Board.

The Assistance Director, Mr. A. B. Wetter, continued to serve as a member of the Local Authorities Board, Board of Administrators of the New Town of Lodgepole (until May 1, 1964), the Edmonton Regional Planning Commission, and the Board of the Secretaries' Superannuation Fund.

School Surveys

In 1963-64 school boards continued to ask the Department of Education for special surveys. Some of these, of a formal and general nature, involved a team of three persons in such a typical problem as that of assessing the need for a large central high school in an area. Other surveys, more in the nature of limited "on the spot" investigations by one or two persons, usually dealt with a building problem at a particular school.

It is significant to note that divisional and county school authorities which once were concerned mainly about developing ordinary centralization are now becoming concerned about high school facilities at centralizations. It is being recognized that a high school of sixty or seventy students simply can not offer the opportunities that young people need. Several counties and divisions have entered into ambitious plans for composite high schools which will have vocational as well as academic offerings. Other authorities, able to gather no more than three or four hundred high school pupils at a school, are planning business education wings at academic high schools.

Legislation

The School Act

During the 1964 Session of the Legislature forty-six amendments were made. The most important were these: by ministerial order the board of trustees of a city district may be increased to seven or nine members, and that of a town district to seven; a divisional trustee is not disqualified if he moves his residence to another subdivision; qualifications of electors of divisional town districts were made the same as those of divisional rural districts; school boards may enter into agreements with other boards whereby services of a teacher are shared; a pupil whose attendance is not compulsory may be suspended or expelled because of inexcusable irregular attendance; boards are permitted to enter into agreements to effect and maintain group insurance and to contribute up to fifty per cent of the premiums; boards are authorized to engage and pay intern teachers; except by consent of the board persons are not permitted to withdraw tenders for school buildings after the time fixed for opening of tenders; a method of determining separate school supporters

of a newly established separate school district was developed; a definition clarified how assessment for persons neither Protestant nor Roman Catholic are to be treated where there is a separate school district; the mill rate of the School Foundation Program Fund was changed from 32 mills to 26 mills; the deadline for a board to give notice of termination of contract of a teacher was changed from June 15 to May 31; the date for certain teachers to resign was changed from July 15 to June 15; revisions were made in the allocation of time for instruction in French.

The Teaching Profession Act

The only amendment extended the definition of Superintendent to include the Deputy Superintendent.

The County Act

Amendments generally referred to the method of electing town and village representatives and their appointment to the school committee.

The Public Junior Colleges Act

Amendments made re-stated the purposes of junior colleges, and clarified procedures for the election and representation of members to the College Board.

The University and College Assistance Act

This new act set out in detail the assistance by the Government to the University of Alberta and Junior Colleges.

SCHOOL BUILDINGS BOARD

(U. R. Shogren, Secretary)

During the calendar year 1963, this Board held eleven regular meetings. Three of these meetings were of two days duration.

Membership of the Board at the end of 1963 remained the same as for 1962 and was as follows:

J. W. Chalmers, Department of Education, Chairman.

J. F. Hunt, Department of Public Works, Vice-Chairman.

F. G. Stewart, Treasury Department, Member.

J. M. Currie, Treasury Department, alternate member for Mr. F. G. Stewart.

U. R. Shogren, Department of Education, Secretary and alternate member for Dr. J. W. Chalmers.

There was no significant change from the previous year in the functions carried out by this Board. It continued firstly, to establish need for new instructional facilities and secondly, to approve amounts of capital costs for subsequent debt servicing by the School Foundation Program Fund.

There was an increasing number of cases involving either the proposed replacement of or modernization of existing space. In the majority of these cases the Board directed the Chairman and Secretary to visit the school concerned and submit a report on the facilities in question before a final decision was arrived at. In addition, the Board continued to be actively engaged in the examination and approval of submissions proposing the provision of vocational facilities under the Federal-Provincial agreement governing such projects.

During the year 1963, the Board approved an amount slightly under \$20,000,000.00 for debt servicing by the School Foundation Program Fund in respect of capital loans and debenture borrowings made by school boards to finance school construction. The following tables, which have been prepared under the direction of Mr. C. G. Jewers, Supervisor of School Buildings, give an indication of the amount of school construction carried out, and in which the Board has necessarily been involved.

**SCHOOL BUILDINGS UNDER CONSTRUCTION JANUARY 1, 1964

* Counties

** The supplementary requisition represents funds obtained directly from the municipality or municipalities in which the school division or county is situated, to augment its revenues under the School Foundation Program Fund Formula. The Fund comprises 32 mills on its equalized assessment from each municipality in the Province, plus a legislative appropriation.

** The supplementary requisition represents funds obtained directly from the municipality or municipalities in which the school district is situated, to augment its revenues under the School Foundation Program Fund formula. The Fund comprises 32 mills on its equalized assessment from each municipality in the Province, plus a legislative appropriation.

TABLE VIII (a)

RECAPITULATION OF TOTAL ENROLMENT AS AT JUNE 30, 1964

(for the School Year 1963-64)

	Boys	Girls	Total
1. (a) At opening of School September, 1963	169,856	159,704	329,560
(b) Added through late registrations	4,109	3,257	7,366
(c) Added during the year from outside of province	2,085	2,035	4,120
2. Transferred in during the year from within the province	10,349	9,095	19,444
3. Gross enrolment	186,399	174,091	360,490
4. Transferred to another school or class in the province	11,047	9,633	20,680
5. NET ENROLMENT	175,352	164,458	339,810 *
6. Withdrew during the year (i.e. ceased to attend school in this province)	6,573	4,891	11,464
7. Enrolment at the end of June, 1964	168,779	159,567	328,346

* When comparing with prior years use Net Enrolment.

TABLE IX
ACCELERATION AND RETARDATION

Enrolment as at October 31, 1963

TABLE XIX

DIAGRAM SHOWING THE ENROLMENT AND AVERAGE ATTENDANCE IN ALBERTA SCHOOLS

TABLE XX

PERCENTAGE OF ENROLLMENT IN GRADE I AND HIGH SCHOOL GRADES FROM 1912

Year	Grade I	Grades 9 - 12	Grades 7 - 12
1912	32.24	3.92	14.65
1917	24.87	5.62	18.45
1922-23	20.87	8.29	22.73
1927-28	17.57	11.44	26.90
1932-33	13.49	17.13	33.61
1937-38	14.19	18.28	35.22
1942-43	12.07	18.98	36.65
1943-44	12.17	18.61	36.71
1944-45	11.95	19.69	37.59
1945-46	12.01	20.73	38.03
1946-47	12.00	21.00	38.12
1947-48	12.34	20.33	37.32
1948-49	12.76	19.72	36.45
1949-50	13.26	19.53	36.07
1950-51	12.59	19.49	36.17
1951-52	12.47	19.20	35.64
1952-53	13.40	18.88	35.24
1953-54	13.87	18.64	34.96
1954-55	12.42	19.16	35.57
1955-56	12.14	19.50	36.12
1956-57	11.69	19.85	36.38
1957-58	11.71	20.66	36.65
1958-59	11.74	21.25	37.50
1959-60	11.71	21.41	38.77
1960-61	11.72	22.11	39.58
October 31, 1961	11.55	23.19	39.99
October 31, 1962	10.94	23.95	40.29
October 31, 1963	10.86	24.60	40.85

TABLE XXI

SUMMARIZED ATTENDANCE RECORD - September 1963 to June 1964

1. Based on number of days individual schools were operated and term of enrolment of individual pupils:	
(a) Enrolment	339,810
(b) Possible pupil-days attendance	63,641,015.0
(c) Actual pupil-days attendance	60,421,293.5
(d) Percentage of attendance: $\frac{(c)}{(b)}$	94.94%
(e) Average Possible number of days attendance for pupils: $\frac{(b)}{(a)}$	187.28
(f) Average Actual number of days attendance for pupils: $\frac{(c)}{(a)}$	177.81
(g) Average number of days lost per pupil: (e) - (f)	9.47
(h) Average daily attendance: $\frac{(c)}{(e)}$	322,625.44
2. Entire school system of Province considered as a unit.	
(a) Number of legal school days	197
(b) Enrolment	339,810
(c) Possible pupil-days attendance: (a) x (b)	66,942,570
(d) Actual pupil-days attendance	60,421,293.5
(e) Percent of attendance: $\frac{(d)}{(c)}$	90.26%
(f) Average actual days each student attended school: $\frac{(d)}{(b)}$	177.81
(g) Average days lost by each student: (a) - (f)	19.19
(h) Average daily attendance: $\frac{(d)}{(a)}$	306,707.07

TABLE XXII
PUPIL-LOAD - AVERAGE NUMBER OF PUPILS PER ROOM *

* Based on the rooms for which an attendance register is kept.

TABLE XXIII

PER PUPIL EXPENDITURE ON EDUCATION 1953-54, 1962-63, 1963-64

	<u>1953-54*</u>	<u>1962-63*</u>	<u>1963-64*</u>
<u>All Schools</u>			
Per year enrolment	208.23	381.28	395.98
Per year (average attendance)	224.89	401.44	417.07
Per day attendance	1.237	2.163	2.227
<u>School Divisions and Counties (including many Town, Village and Consolidated School Districts)</u>			
Per year enrolment	238.18	441.26	453.24
Per year (average attendance)	259.52	467.23	479.88
Per day attendance	1.428	2.566	2.561
<u>School Districts not in Divisions or Counties</u>			
<u>City Public Schools -</u>			
Per year enrolment	187.20	353.95	372.38
Per year (average attendance)	200.34	371.34	390.60
Per day attendance	1.097	1.969	2.080
<u>Town and Village Public Schools -</u>			
Per year enrolment	164.80	349.56	376.90
Per year (average attendance)	175.62	392.28	397.01
Per day attendance	.967	1.947	2.110
<u>Consolidated Schools -</u>			
Per year enrolment	228.34	404.60	432.87
Per year (average attendance)	243.85	425.02	453.57
Per day attendance	1.329	2.292	2.426
<u>R.C. Separate Schools (City, Town, Village & Rural) -</u>			
Per year enrolment	148.11	322.55	337.11
Per year (average attendance)	158.01	338.27	354.48
Per day attendance	.895	1.8113	1.906

* Expenditures are for the calendar years 1953, 1962 and 1963 respectively.

TABLE XXIV

AVERAGE SALARY RATE OF TEACHERS 1962-63 and 1963-64

	Number of Teachers 1962-63	Average Salary Rate 1962-63		Number of Teachers 1963-64	Average Salary Rate 1963-64
All Schools	13,988	5,487.18	All Schools	14,972	5,700.01
Divisions and Counties	5,971	5,274.45	Divisions and Counties	6,221	5,430.28
<u>Public School Districts:</u>			<u>Public School Districts:</u>		
City and Town Schools	5,774	5,933.15	City and Town Schools	6,263	6,100.98
Village Schools	65	5,520.62	Village Schools	28	5,411.68
Consolidated Schools	101	5,283.28	Consolidated Schools	108	5,288.94
<u>R.C. Separate School Districts:</u>			<u>R.C. Separate School Districts:</u>		
Cities and Towns	1,730	5,066.45	Cities and Towns	1,975	5,307.11
Villages	31	4,390.65	Villages	34	4,598.41

TABLE XXV

TEACHERS' SALARIES - - - 1963-64 - - - IN ALL SCHOOLS

		Number of Teachers	Salaries Paid		Lowest	Average
			Highest			
Academic, High School and Professional	Male	3,017	18,000		3,500	7,710.71
	Female	1,892	12,250		3,300	6,986.80
Standard E and Standard S (or both)	Male	874	11,675		3,000	5,182.09
	Female	2,450	10,650		3,000	4,982.97
Elementary and Intermediate and First	Male	269	13,250		3,400	7,387.54
	Female	1,142	14,100		3,250	5,204.76
Junior E	Male	675	9,425		3,000	4,716.01
	Female	3,328	9,725		3,000	4,471.71
Second	Male	32	7,350		3,800	5,193.78
	Female	1,407	7,850		3,550	4,807.34
Letter of Authority	Male	217	9,240		3,000	4,603.09
	Female	669	8,200		3,000	4,096.89
		14,972	13,000		3,000	5,700.01
